

**REF: PPR/18 - 09/1**

**PUBLIC NOTICE ON CAP PRICES FOR PETROLEUM PRODUCTS EFFECTIVE**  
**WEDNESDAY, 5<sup>th</sup> SEPTEMBER 2018**

The Energy and Water Utilities Regulatory Authority (EWURA) hereby publishes Cap Prices for petroleum products, applicable in Tanzania Mainland. These retail and wholesale prices are applicable effective **Wednesday, 5<sup>th</sup> September 2018**. Hereinafter, kindly, take note of the following:

- (a) Retail and wholesale prices for all petroleum products imported in the country through Dar es Salaam port have changed compared to prices that were published on 1<sup>st</sup> August 2018. For the month of September 2018, retail prices of Petrol, Diesel and Kerosene have decreased by TZS 10/litre (equivalent to 0.43%), TZS 19/litre (equivalent to 0.83%) and TZS 24/litre (equivalent to 1.05%), respectively. Similarly, compared to the publication of last month, wholesale prices of Petrol, Diesel and Kerosene have also decreased by TZS 10.10/litre (equivalent to 0.45%), TZS 18.95/litre (equivalent to 0.87%), and TZS 23.78/litre (equivalent to 1.11%), respectively. The decrease in local prices of petroleum products is mainly due to a decrease in the world oil market prices of July 2018 when compared to those of June 2018 which were applicable in the local prices published in August 2018.
- (b) Retail and wholesale prices for Petrol and Diesel in Tanga region have changed compared to prices that were published on 1<sup>st</sup> August 2018. It should be noted that, before August 2018, the last new consignment of Petrol and Diesel in Tanga port was received in May 2018. For the month of September 2018, retail prices of Petrol and Diesel **in the Northern regions** have increased by TZS 114/litre (equivalent to 5.11%) and TZS 102/litre (equivalent to 4.70%), respectively. Likewise, wholesale prices of Petrol and Diesel have also increased by TZS 113.70/litre (equivalent to 5.39%) and TZS 101.50/litre (equivalent to 4.97%), respectively. The increase in prices of petroleum products in Tanga region are attributed to increases in the world oil market prices of July 2018 when compared to those of March 2018 which were applicable since the last consignment was received in Tanga port.
- (c) It is also worth noting that, while the last consignment of Kerosene in Tanga port was received in October 2017, due to depletion and non-replacement of the product, Northern regions were sourcing Kerosene from Dar es Salaam since April 2018, and hence prices of Kerosene were based on the cost of the product received through Dar es Salaam port and bridging costs to Northern regions. When compared to prices of Kerosene in Dar es Salaam as published in August 2018, prices of Kerosene in the Northern regions have decreased by 1% due to a decrease in the world oil market prices.
- (d) Moreover, there was no new consignment of petroleum products imported through Mtwara port in the month of August 2018. Hence, in September 2018, the prices of petroleum products in the Mtwara region remain the same as they were in August 2018. The petroleum products were last received at Mtwara port in June 2018 where its world market prices were those of May 2018. Furthermore, due to the excess of petroleum products at

Mtwara storage terminals, prices of petroleum products for Lindi and Ruvuma regions have been computed based on the cost of the products received through Mtwara port and the bridging cost to the regions. Therefore, Petrol Station Operators in the Mtwara, Lindi and Ruvuma regions are encouraged to get Petrol and Diesel from Mtwara storage terminals. Since there is no Kerosene at Mtwara storage terminals, Petrol Station Operators in Mtwara, Lindi and Ruvuma regions are also advised to source the product from Dar es Salaam and therefore, the retail price of Kerosene for those regions will be based on the cost of the product received through Dar es Salaam port and bridging cost to the regions.

- (e) The Authority would like to remind the public that these cap prices can be accessed through mobile phones by dialling **\*152\*00#** and then following the provided instructions. This service is free of charge and is available in all mobile phone service providers in the country.
- (f) In line with the prevailing sector legislation (**Petroleum Act, 2015, section 166**), prices of petroleum products are governed by rules of demand and supply. EWURA shall continue to encourage competition in the sector by making available petroleum products pricing information including cap prices. This information on prices is intended to enable stakeholders make informed decisions on petroleum prices at any particular time.
- (g) Oil Marketing Companies are free to sell their products at a price that gives them a competitive advantage provided that, such **price does not exceed the price cap for the relevant product as it is computed using the approved formula, which was gazetted through the Government Notice No. 269 published in June 2018.**
- (h) All petrol stations are required to publish petroleum product prices on clearly visible boards. The price boards should clearly show prices charged, discounts offered as well as any trade incentives or promotions on offer. Consumers are encouraged to purchase from stations that sell products at the most competitive prices and offer better services. **It is an offence not to have prices published on boards located in clearly visible places in front of petrol stations. Failure to adhere to this directive will attract punitive measures from EWURA.**
- (i) Retailers must issue receipts printed from an Electronic Fiscal Pump Printer (EFPP) with respect to all sales that they make and consumers are required to **demand and keep those receipts** that clearly show the name of petrol station, date on which such purchase was made as well as, the type of petroleum product (fuel) and price per litre for every purchase they make. This can be used as an exhibit in case of a complaint lodged in the event that the selling price is above the cap price or in case the products sold do not meet the approved specifications and also, provide an assurance that appropriate government taxes on petroleum products purchased are fully accounted for recovery from the Retailers.

#### **A: RETAIL PRICES**
