15. APPENDICES	67

CHAIRMAN'S STATEMENT

On behalf of the EWURA Board of Directors, I am delighted to present the ninth Mid and Downstream Petroleum Sub-Sector Performance Report for the year 2022. The report provides information on relevant matters in the sub-sector, including legal instruments governing the sub-sector, available infrastructure, suppliers of petroleum products in the country, quantity of imported petroleum products, market share of licensed operators, and prices of liquid petroleum products. EWURA continued to oversee all matters related to the petroleum industry, including security of supply of petroleum products, as well as operators' compliance with quality standards for infrastructure and petroleum products. Furthermore, the Authority continued to promote the construction of petrol stations in rural areas and the safe distribution of LPG to compliment the Government's effort in transitioning to clean energy for cooking.

In the period under review, the country had stable supply of petroleum products, investments in rural petrol stations continued to increase and local prices were set at tolerable levels, despite the high increase in world market prices.

I would like to extend my special gratitude to the Government of Tanzania under Her excellency Dr. Samia Suluhu Hassan, the President of the United Republic of Tanzania, for providing subsidies between June and December 2022 when global prices of petroleum products were very high to ensure local prices are kept affordable to consumers. My appreciation also goes to the Ministry of Energy for its continued support and to all key stakeholders in the mid and downstream petroleum sub-sector for their cooperation.

Finally, I take this opportunity to congratulate my colleagues, the EWURA Board members, Management and Staff for their commitment, dedication, and insightful contributions aimed at developing the sub-sector.

Prof. Mark J. Mwandosya
BOARD CHAIRMAN
June 2023

FOREWORD

Under the Petroleum Act, Cap 392 together with the Energy and Water Utilities Regulatory Authority (EWURA) Act, Cap 414, EWURA is mandated to regulate the mid and downstream petroleum sub-sector in Mainland Tanzania. The Authority accomplishes its regulatory roles by undertaking technical, economic and safety regulatory functions. As provided in the Petroleum Act, EWURA is required to prepare and publish an annual report that disseminates information and data regarding the performance of the mid and downstream petroleum sub-sector in Mainland Tanzania. This report is for the performance of the sub-sector for the year 2022.

In the year under review, the importation of petroleum products for local consumption increased by 5.8% from 3.96 billion litres in the year 2021 to 4.18 billion litres. Similarly, the imports of transit products to neighbouring countries increased by 28.9% from 3.11 billion litres in the year 2021 to 4.01 billion litres in the year 2022. In totality, importation of petroleum products in 2022 amounted to 8.19 billion litres, which is an increase of 16% from 7.07 billion litres imported in 2021.

LPG importation also continued to grow, with imports reaching 250,200 MT in the year 2022, which is a 0.8% increase from 248,216 MT imported in the year 2021. The Government and LPG Marketing Companies will continue to build awareness among the public on the importance and advantages of using LPG for cooking to replace charcoal and firewood. The lubricants market also grew by 5%, with total imports and blended quantities reaching 58.48 million litres, having increased from 55.52 million litres that were imported and blended in the year 2021.

In the year under review, crude oil prices increased by 40% to an average price of 99 USD/BBL compared to an average price of 70.76 USD/BBL recorded in the year 2021. Consequently, the FOB prices of refined products and local pump prices also increased. The increase in crude oil prices was contributed by geopolitical tension with Russia that resulted in the invasion of Ukraine in 2022. This war together with low global crude oil inventories contributed to the growth of crude oil prices in world markets.

EWURA has continued to regulate the mid and downstream petroleum sub-sector by ensuring the sub-sector is streamlined. EWURA ensured there is security of supply throughout the year and continued to undertake inspections to ensure petroleum operations are conducted in compliance with the applicable laws, standards and best petroleum industry practices.

I hope that all our stakeholders will find this report useful in their investment decisions and planning for improved efficiency in the mid and downstream petroleum sub-sector, particularly in improving the available infrastructure and constructing new ones, especially petroleum products receiving infrastructure and retail outlets in rural areas.

Dr. James Andilile Mwainyekule
DIRECTOR GENERAL
April 2023

EXECUTIVE SUMMARY

EWURA is mandated by Section 30(1) of the Petroleum Act, Cap 392 to perform technical, economic, and safety regulatory functions for mid and downstream petroleum activities in mainland Tanzania. EWURA is required to regulate the sub-sector in an effective, efficient, and transparent manner. In this regard, EWURA prepares annual performance reports that provide data and information about the petroleum sub-sector to the general public.

This is the Ninth Mid and Downstream Petroleum Sub-Sector Performance Report which provides key sub-sector information, such as data and information on regulatory tools used to regulate the sub-sector, available petroleum infrastructure, petroleum product importation, consumption levels and the trend of prices of white petroleum products. Below is a highlight of the sub-sector's performance.

Infrastructure

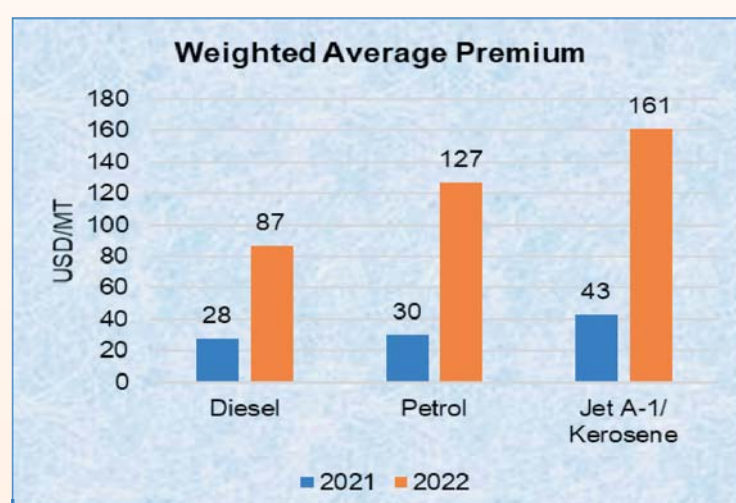

The main infrastructure for the mid and downstream petroleum sub-sector in Tanzania are berthing facilities at Dar es Salaam, Tanga, and Mtwara ports, and petroleum products receiving and storage terminals located in the vicinity of the aforementioned ports. The capacities of the berthing and storage facilities have not changed. The capacities remain the same as reported in the year 2021. As of December 2022, there were 21 operational petroleum receiving terminals located around Dar es Salaam, Tanga, and Mtwara ports with a total storage capacity of 1,343,115 cubic metres out of the installed capacity of 1,409,244 cubic metres from 23 receiving terminals. There are six Liquefied Petroleum Gas (LPG) storage facilities with a total storage capacity of 15,750 MT. By the end of 2022, there were 2,260 operating petrol stations with 341 stations located in rural areas. Below is the capacity of berthing facilities:

Berthing Facility	Maximum Vessel Capacity (DWT)
Single Buoy Mooring (SBM) at Dar es Salaam port	150,000
Kurasini Oil Jetty 1 (KOJ1) at Dar es Salaam port	45,000
Kurasini Oil Jetty 2 (KOJ2) at Dar es Salaam port	5,000
Tanga	40,000
Mtwara	38,000

Bulk Procurement System (BPS)

Liquid petroleum products for local consumption are imported using the Bulk Procurement System (BPS). The products are imported through Dar es Salaam, Tanga, and Mtwara ports. In the year 2022, the Petroleum Bulk Procurement Agency (PBPA) awarded 115 BPS contracts to suppliers that won BPS tenders for the supply of petroleum products to Tanzania.

The weighted average of the premium tendered by the suppliers that won the BPS tenders in the year 2022 was 87.11 USD/MT for diesel, 127 USD/MT for petrol, and 161 USD/MT for Jet A1/Kerosene. The weighted average premium for diesel, petrol, and Jet A-1/kerosene in the year 2022 increased by 211%, 324%, and 275% respectively compared to the weighted average premiums in the year 2021.

Importation of Petroleum Products

Importation of liquid petroleum products increased by 16% from 7.07 billion litres imported in 2021 to 8.19 billion litres imported in 2022. Local imports increased by 5.6%, while transit imports increased by 29%. The increase is mainly attributed to increased economic activities as the GDP of Tanzania in 2022 grew by 5.2% in the third quarter of 2022 based on the NBS report “**Highlights on The Third Quarter (July-September) Gross Domestic Product 2022.**”

LPG importation increased by 1% from 248,216 MT imported in 2021 to 250,200 MT imported in 2022. The Government and LPG Marketing Companies (LMCs) continue to create awareness to the public on the importance of using LPG instead of using traditional sources of fuel, such as charcoal, firewood, and kerosene, coupled with market promotions done by LMCs so as to promote usage of LPG.

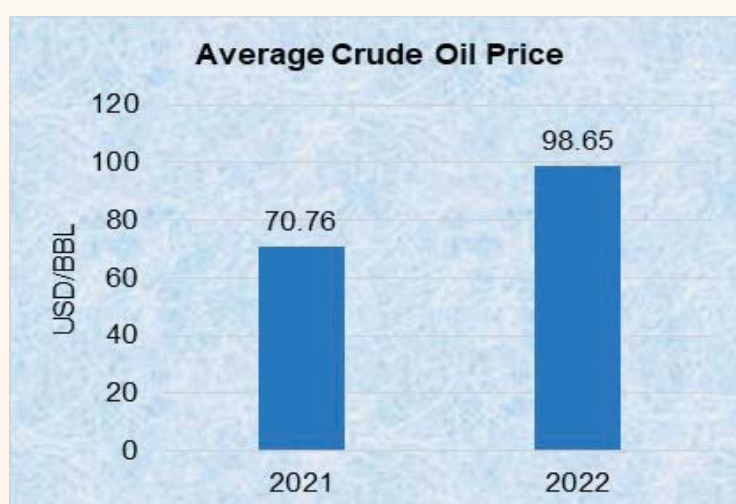

In the year under review, the number of lubricants supplied to the market was 58.48 million litres which is a 5% increase from 55.52 million litres supplied in the year 2021. Out of the quantity that was supplied in the year 2022, 82% was from locally-blended products and the remaining quantity was from imports.

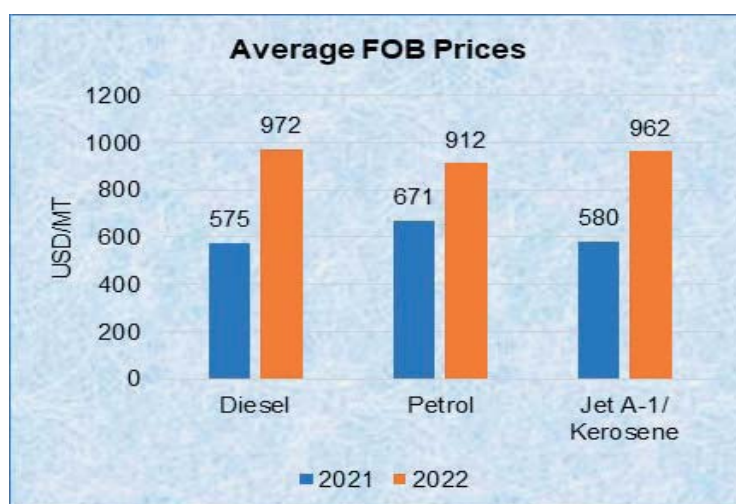

Petroleum Prices

The average crude oil price in 2022 was 98.65 USD/BBL, which is an increase of 40% compared to the average crude oil price of 70.76 USD/BBL in the year 2021. The increase in crude oil prices is attributed to the Russia–Ukraine war and low global crude oil inventories.

The increase in crude oil prices also led to an increase in the prices of refined products. In the year under review, the FOB prices of petrol, diesel, and kerosene/Jet A-1 increased by 36%, 69%, and 66% respectively compared to the average FOB prices recorded in the year 2021.

Compliance Monitoring of Petroleum Facilities

During the period under review, EWURA inspected 659 petroleum facilities to check compliance with the applicable laws and best petroleum industry practices. Out of the inspected petroleum facilities, 550 facilities, (equivalent to 83%) complied with all requirements at the time of inspections which is an increase of 22% compared to the 61% compliance level attained in 2021. Non-compliant facilities were closed until all of the observed anomalies were rectified. The Authority will continue to conduct regular compliance monitoring and enforcement activities to ensure that all petroleum facilities comply with the applicable laws, standards, and best petroleum industry practices. The quality of the petroleum infrastructures continues to improve, especially retail outlets.

Monitoring of the Quality of Petroleum Products Distributed in the Market

During the period under review, EWURA collected 874 samples from licensed petroleum facilities (storage depots and retail outlets) to check conformity to quality standards. Out of the collected samples, 32 samples, equivalent to 3.66%, did not conform to standards. This is an improvement from the non-compliance of 12.19% attained in 2021. Legal action was taken against operators that were found with non-conforming products. Generally, the quality of petroleum products distributed in the market in Tanzania met quality specifications.

Challenges in the Petroleum Mid and Downstream Sub-Sector

The main challenges that still face the sub-sector are the lack of a Single Receiving Terminal (SRT) for white petroleum products to ensure products are received within a short period and hence reduce demurrage costs and product losses; limited capacity of LPG offloading facility at the ports; inadequate investments in petrol stations in rural areas; smuggling of petroleum products from neighbouring countries; high LPG starter pack cost which limits the increase of users, especially low-income earners; and illegal re-filling of LPG cylinders.

1. INTRODUCTION

The Mid and Downstream Petroleum Sub-Sector Performance Report is published by the Energy and Water Utilities Regulatory Authority (EWURA) on an annual basis. This is the ninth edition since 2014. The report provides data and information on the mid and downstream petroleum sub-sector in Tanzania. It provides data and information on regulatory tools used in regulating the sub-sector, available petroleum infrastructure, petroleum products importation, movement of petroleum products and prices in the world and local market, the performance of the fuel marking programme, and operators' compliance to various legislation, including supply of products that meet national quality specifications.

1.1 Regulatory Instruments and Standards

The mid and downstream petroleum sub-sector is regulated using various legal instruments and standards. These instruments include the National Energy Policy 2015, the Petroleum Act 2015 Cap 392, EWURA Act, Cap 414, and other cross-cutting regulatory instruments.

1.1.1 Legislation

In addition to the aforementioned legislative tools, various subsidiary legislation are used in regulating the mid and downstream petroleum sub-sector. These include:

- (i) The Petroleum (General) Regulation, 2011 GN. No. 163;
- (ii) The Petroleum (Bulk Procurement) Regulations, 2017 GN. No. 198;
- (iii) The Petroleum (Wholesales, Storage Retail, and Consumer Installation) Rules 2022 GN. No 150;
- (iv) The Petroleum (Retail Operations in Townships and Villages) Rules, 2020 GN. No. 818;
- (v) The Petroleum (Liquefied Petroleum Gas Operations) (Amendment) Rules, 2022-GN. No. 144;
- (vi) The Petroleum (Marine Loading and Offloading) Rules, 2018 GN. No. 379;
- (vii) The Petroleum (Refinery Operations) Rules, 2018 GN. No. 378;
- (viii) The Petroleum (Lubricants Operations) Rules, 2022 GN. No. 115;
- (ix) The Petroleum (Waste Recycling) Rules, 2017 GN. No. 220;
- (x) The Petroleum (Sampling and Testing) Rules, 2010 GN. No. 211;
- (xi) The Petroleum (Marking and Quality Control) Rules, 2010 GN. No. 210;
- (xii) The Petroleum (Pipeline Operations) Rules, 2015 GN No. 477
- (xiii) The Petroleum (Licensing Fees) Rules, 2020 GN. No. 816
- (xiv) The Petroleum (Bitumen and Petcoke Operations) Rules, 2016 GN. No. 99
- (xv) The Energy and Water Regulatory Authority (Petroleum Products Price Setting) Rules, 2022 GN. No. 57;
- (xvi) Energy and Water Utilities Regulatory Authority (Compounding of Offences) Regulations, 2020 SUPP GN. No. 397; and
- (xvii) The Petroleum (Condensate Operations) Rules, 2021 GN. No. 395.

1.1.2 Petroleum Products and Infrastructure Standards

According to section 30(2)(b) of the Petroleum Act, Cap. 392, EWURA is mandated to monitor the quality and standards of petroleum products and the petroleum handling infrastructures. In performing its regulatory activities, the Authority ensures that petroleum products and infrastructure comply with standards. Tanzania Bureau of Standards (TBS) is the statutory body in Mainland Tanzania whose main responsibility, among others, includes the formulation of standards.

In developing Tanzanian standards related to petroleum products and facilities, TBS involves key stakeholders, including EWURA. International standards are used in the absence of national standards. The applicable national standards are shown below:

Petroleum Products Standards

- (i) TZS 580:2017 (3rd Ed) Illuminating Kerosene (IK) – Specification;
- (ii) TZS 798:2021 (3rd Ed) Lubricating Greases – Specification;
- (iii) TZS 818:2021 (2nd Ed) Liquefied Petroleum Gases – Specification;
- (iv) TZS 2260:2018 (1st Ed) – High-performance engine lubricating oil for diesel engines - Specification;
- (v) TZS 2261:2018 (1st Ed) – High-performance engine lubricating oil for petrol engines- Specification;
- (vi) TZS 667:2018 (2nd Ed) Motor Vehicle Brake Fluids – Specification;
- (vii) TZS 673:2016 (2nd Ed) Fuel Oils - Specifications;
- (viii) TZS 672:2021 (5th Ed) EAS 158:2019 ICS 75.160.20: Automotive gasoline (premium motor spirit) – Specification;
- (ix) TZS 674:2012 (2nd Ed) EAS 177:2012 ICS 75.160.20: Automotive gasoil (automotive diesel) – specification;
- (x) TZS 1099: 2017 (2nd Ed) Automotive Biodiesel Fuel - Specifications;
- (xi) TZS 1068 (9):2008/ISO 6743-9 Lubricants, Industrial Oils and related products (Class I) Classification – Part 9: Family X (Greases);
- (xii) TZS 666: 2017 (2nd Ed) – Aviation Turbine Fuel (Jet A-1) Specifications;
- (xiii) TZS 1074: 2009 (1st Ed) – ISO 12922: 1999 – Lubricants, industrial oils, and related products (class L) – Family H (hydraulic systems) Specifications for categories HFAE, HFAS, HFB, HFC, HFDR AND HFDU;
- (xiv) TZS 1072: 2018 (2nd Ed) – ISO 11158: 2009 - Lubricants, industrial oils and related products (class L) – Family H (hydraulic systems) – Specifications for categories HH, HL, HM, HV and HG;
- (xv) TZS 1073: 2018 (2nd Ed)/ - ISO 15380: 2002 – Lubricants, industrial oils, and related products (class L) – Family H (Hydraulic systems- Specification for categories HETG, HEPG HEES and HEPR;
- (xvi) TZS 1066 (Part 99): 2009 (1st Ed)- ISO 6743-99: 2002 – Lubricants, industrial oils, and related products (class L) — Classification —General;
- (xvii) TZS 675: 2018 (4th Ed) – Multipurpose automotive gear lubricants (EP) — Specification;
- (xviii) TZS 1691: 2021 (3rd Ed) – Automatic Transmission Fluids (ATF) based on road vehicles – Specification;
- (xix) TZS 2653-1:2021/ ISO 12925-1:2018 - Lubricants, industrial oils and related products (class L) - Family C (gears) - Part 1: Specifications for lubricants for enclosed gear systems;
- (xx) TZS 2852:2021/ISO 8068:2006 - Lubricants, industrial oils and related products (class L) - Family T (Turbines) - Specification for lubricating oils for turbines;
- (xxi) TZS 2651:2021/ISO 13738:2011 - Lubricants, industrial oils and related products (class L) - Family E (Internal combustion engine oils) - Specifications for two-stroke-cycle gasoline engine oils (categories EGB, EGC and EGD);
- (xxii) TZS 2652-6:2021/ISO 6743-6:2018 - Lubricants, industrial oils and related products (class L) - Classification - Part 6: Family C (gear systems); and
- (xxiii) TZS 2652-99:2019/ISO 6743-99:2002-Lubricants, industrial oils and related products (class L) - Classification - Part 99: General Establishes a general system of classification, which applies to lubricants, Industrial oils and related products, designated by the prefix letter "L". Within class L, 18 families of product.

Petroleum Infrastructure Standards

- (i) TZS 1076: 2009 (1st Ed) – Selection, specification, installation, operation, and maintenance of automatic liquid level and temperature measuring instruments on petroleum storage tanks;
- (ii) TZS 1113:2009 (1st Ed) – Depots for the storage of petroleum products;
- (iii) TZS 1115: 2009 (1st Ed) – Petroleum Products Retail Outlets;
- (iv) TZS1114:2015 (2nd Ed) – Road transport vehicles, containers, and equipment used for the transportation of dangerous petroleum products;
- (v) TZS 1079: 2009 (1st Ed) – Installation of underground storage tanks, pumps/ dispensers and pipework at service stations and consumer installation;
- (vi) TZS 1007:2008 (1st Ed) – Code of practice for cleaning of the petroleum storage tanks and disposal of sludge;
- (vii) TZS 916:2015 (1st Ed)/ISO 10464:2004 – Gas cylinders – Refillable welded steel cylinders for liquefied petroleum gas (LPG) – Periodic Inspection and Testing;
- (viii) TZS 915:2015 (1st Ed)/ISO 10691:2004 – Gas cylinders – Refillable welded steel cylinders for liquefied petroleum gas (LPG) – Procedures for checking before, during and after filling;
- (ix) TZS 1228:2009 (1st Ed)/ISO 22991:2004 – Gas cylinders – Transportable refillable welded steel cylinders for liquefied petroleum gas (LPG) – Design and construction;
- (x) TZS 2872: 2021 (1st Ed) - The handling, storage, distribution and maintenance of liquefied petroleum gas in domestic, commercial, and Industrial installations: Liquefied petroleum gas installations involving storage vessels of individual water capacity exceeding 500 L;
- (xi) TZS 2312: 2019 (1st Ed) - Domestic gas stoves for use with liquefied petroleum gases – Specification;
- (xii) TZS 2374-1:2020 - EAS 924-1:2018 - Handling, storage, and distribution of Liquefied Petroleum Gas (LPG) in domestic, commercial, and industrial installations — Code of practice Part 1: Storage and filling sites for refillable LPG containers of a capacity not exceeding 150 L; and
- (xiii) TZS 2374-2:2020 - EAS 924-2: 2018- Handling, storage, and distribution of Liquefied Petroleum Gas (LPG) in domestic, commercial, and industrial installations — Code of practice — Part 2: LPG installations involving gas storage vessels of individual water capacity exceeding 150 L and combined water capacity not exceeding 9000 L per installation.

2. LIQUID PETROLEUM PRODUCTS INFRASTRUCTURE

The main available infrastructure in the mid and downstream petroleum sub-sector includes offloading facilities at the ports, petroleum receiving and storage terminals, petroleum retail outlets (petrol stations), LPG storage and re-filling facilities, and lubricant blending plants.

2.1 Offloading/Receiving Facilities

All liquid petroleum products are imported using marine tankers which are received through berthing facilities located at Dar es Salaam, Tanga, and Mtwara ports. The imported products are for consumption in the country and for transit to neighbouring landlocked countries of Zambia, Uganda, the Democratic Republic of Congo (DRC), Malawi, Rwanda, and Burundi. Most of the transit products are received through Dar es Salaam port.

Petroleum products for local consumption imported through Mtwara port are designated to serve Mtwara, Lindi, and Ruvuma regions, whereas products imported through Tanga port are designated to serve the northern regions of Tanga, Kilimanjaro, Manyara, and Arusha. The two ports also receive products for the transit market although Dar es Salaam port remains as the main port for receiving transit products. **Table 1** indicates the maximum safe operating capacity and products received at the berthing facilities at each port.

Table 1: Maximum Safe Operating Capacity and Products Received by Berthing Facility at Each Port

S/N	Name of the Port	Maximum Safe Operating Capacity of Vessels that can be handled (DWT)	Products that can be received through the facility
1	Dar es Salaam		
	SBM	150,000	Diesel and Crude Oil
	KOJ1	45,000	Petrol, Heavy Fuel Oil (HFO), Kerosene, Jet A-1 and Diesel
	KOJ2	5,000	LPG and Back loading of Petrol, Diesel, Kerosene and Jet A-1 to Zanzibar
2	Tanga	40,000	Diesel, Petrol and Kerosene
3	Mtwara	38,000	Diesel and Petrol

2.2 Petroleum Storage Terminals

2.2.1 Receiving terminals

Tanzania Mainland has 23 petroleum receiving terminals located around Dar es Salaam, Tanga, and Mtwara ports with a total storage capacity of 1,409,244 cubic metres. However, as of 31st December 2022, only 21 terminals were operational having a total capacity of 1,343,115 cubic metres. The terminals that are not operational are those of National Oil (T) Limited and Mogas Tanzania Limited. Amongst all facilities, TIPER has the largest storage capacity which is equivalent to 18% of the total capacity. These terminals receive petroleum products directly from vessels berthed at berthing facilities at the ports and can store products to meet the country's demand for about 122 days at the current consumption rate of 4,131,560,960 cubic metres per annum. **Appendix 1** presents the storage capacities of each receiving terminal.

2.2.2 Inland storage depot

There are 29 upcountry inland storage depots with a total storage capacity of 75,625 cubic metres. These depots can receive products from terminals using railway wagons and trucks. However, as most of the petroleum products are transported by road tankers, the use of these depots was considered to be cost-inefficient mainly due to double handling costs. As a result, most of these depots are non-operational. Road tankers are now used to transport petroleum products directly from receiving terminals at the ports to the petroleum retail outlets and consumer installations. Following the revival of the railway route from Tanga to Isaka, Kigoma, and Mwanza, some of the inland storage depots have been rehabilitated and have started operations. The capacities of inland storage depots are presented in **Appendix 2**.

2.3 TAZAMA Receiving Terminal

TAZAMA receiving terminal is connected to a Single Buoy Mooring (SBM) with a 28" pipeline that is 8Km long running from SBM through Mjimwema Beach to Kigamboni tank farm, consisting of six storage tanks with a total capacity of 231,000 cubic metres. This receiving terminal was used for receiving spiked crude oil and transporting the product through a 1,710km long pipeline to Indeni Refinery located at Ndola in Zambia for refining. In the year 2022, the Zambian Government decided to change the use TAZAMA facility from handling spiked crude oil to handling refined petroleum products. In the period under review, TAZAMA started to convert the infrastructures to be able to handle Gasoil. The activities that have been done include cleaning and repairing the six (6) petroleum storage tanks at Kigamboni and flushing the pipeline from Kigamboni to Ndola, Zambia. The five (5) tanks and the pipeline have been completed and are ready for receiving, storing, and transporting Gasoil. One (1) tank is still under major rehabilitation.

2.4 Transportation Infrastructure

Distribution of petroleum products within Tanzania Mainland from the receiving terminals at the ports is mainly done by road using road tankers. Road tankers are also used to transit petroleum products to landlocked neighbouring countries.

Despite the use of road tankers to transport most of the petroleum products, the Tanga to Isaka, Kigoma, and Mwanza railway line has been revived and is used to transport petroleum products. The railway wagons are now used by GBP to transport products from the Tanga Terminal to storage depots in Kigoma and Mwanza.

TAZAMA Pipelines Limited owns and operates a 1,710-km long pipeline with a throughput of 1,100 MT per annum from Kigamboni, Dar es Salaam in Tanzania to Indeni Refinery located at Ndola in Zambia. The pipeline was being used for transporting spiked crude oil for refining at Indeni Refinery located at Ndola in Zambia. However, TAZAMA facilities stopped operations in September 2021 following the closure of Indeni Refinery. The Zambian Government has decided to use the pipeline for transporting Gasoil. The rehabilitation of the tanks and the pipeline is underway.

TAZAMA has plans to increase the storage capacity from 231,000M³ to 380,000 M³ by constructing new storage tanks at Kigamboni and constructing new multiple product pipelines from Dar es Salaam to Ndola along the current wayleave with take-off points (Tee) at Morogoro, Makambako, Mbeya, Songwe in Tanzania and Mpika and Serenje in Zambia.

2.4 Petrol Stations

As of 31st December 2022, there were 2,260 operational petrol stations in the country compared to 1,997 petrol stations in the year 2021, equivalent to an increase of 13.17%. By the end of 2022, there were 341 petrol stations located in rural areas compared to 279 in the year 2021, equivalent to an increase of 22.22%. The ongoing increase in the number of petrol stations in both urban and rural areas is attributed to the increased demand for petroleum products in the country due to growth in economic activities, good investment policy in the country, and an increase in road networks. Most of these petrol stations are located in urban areas even though there is increased demand for petroleum products in rural areas.

The Government continues devising and implementing various strategies to increase investments in petrol stations in rural areas. Among other measures, the Authority continued to issue conditional licences to rural petrol stations that meet minimum HSE requirements so that they can continue to offer services while the respective operators rectify any observed anomalies within a given timeframe. In addition, the Petroleum (Wholesale, Storage, Retail and Consumer Installation Operations) Rules also require retailers who own at least four petrol stations in either city, municipal, or district council to construct at least one petrol station in township or village areas that have no petrol stations.

In 2022, 65 rural petrol stations were licensed, bringing the total number of licensed rural petrol stations to 341 by the end of 2022, up from 276 in 2021.

Table 2 presents the number of licensed petrol stations in each region.

Table 2: Licensed Petrol Stations in Mainland Tanzania as of 31st December 2022

Region	No. of Urban Petrol Station	No. of Rural Petrol Station	Total Number of Petrol Stations
Arusha	105	12	117
Coast	124	14	138
Dar es Salaam	375	0	375
Dodoma	89	24	113
Geita	64	15	79
Iringa	48	3	51
Kagera	88	18	106

Grand Total	1,919	341	2,260

3. LIQUID PETROLEUM PRODUCTS SUPPLY AND CONSUMPTION

3.1 Importation of Petroleum Products through the Bulk Procurement System

Through the coordination done by PBPA, the country continued to import petrol, diesel, kerosene, and Jet A-1 through Bulk Procurement System (BPS). Other petroleum products including LPG, HFO, lubricants, base oil, and bitumen are imported by companies licensed to conduct wholesale business through independent arrangements managed by each company.

A total of 115 BPS tenders were floated in 2022 which is an increase of 8 tenders compared to 107 BPS tenders floated in 2021. The increase in tenders is attributed to the increase in demand for petroleum products in the country and the neighbouring countries. **Table 3** indicates a summary of suppliers who won BPS tenders and the number of tenders won during the year under review. **Appendix 3** presents a list of all BPS tenders, the winning bidders, and the corresponding premiums.

Table 3: Winning Suppliers and Number of Tenders Won in the year 2022

S/N	BPS Tender Winner	No. of Tenders Won	%
1	AUGUSTA ENERGY SA	22	19%
2	ADDAX ENERGY SA	28	24%
3	SAHARA ENERGY RESOURCES	26	23%
4	VITOL BAHRAIN EC	17	15%
5	HAPCO FZE	10	9%
6	TRAFIGURA PTE LTD	1	1%
7	TOTALS TOTAL OIL TRADING SA	3	3%
8	TPDC	4	3%
9	E3 Energy DMCC	3	3%
10	OILCOM (T) LTD	1	1%
	TOTAL BPS Tender	115	100%

As shown in **Figure 1**, the weighted average premiums in 2022 increased by 211%, 324% and 225% for diesel, petrol and Jet A-1/kerosene, respectively compared to the weighted average premiums in 2021.

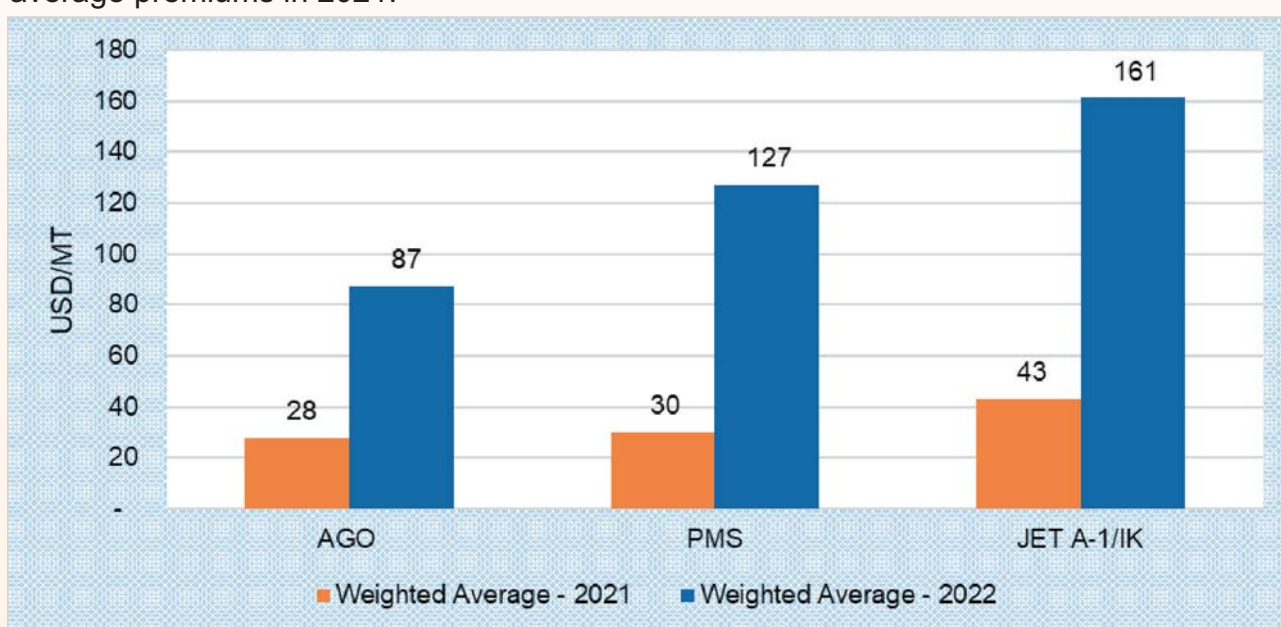

Figure 1: Weighted Average Premiums in 2021 and 2022

Premiums for the supply of diesel through Dar es Salaam port continued to be lower than premiums of the diesel imported through Tanga and Mtwara ports mainly due to economies of scale that can be attained at the Dar es Salaam port. Contrary, Mtwara port has indicated the lowest premiums for PMS. The average premiums for the supply of petroleum products through the three ports are shown in **Table 4**. The monthly premiums of each petroleum product for each port are provided in **Appendix 4**.

Table 4: Weighted Average Premiums for each Port

Port	Number of Cargoes	Diesel Premium USD/MT	Petrol Premium USD/MT	Jet A-1 / Kerosene Premium USD/MT
Dar es Salaam	99	83.15	127.20	161.16
Tanga	16	117.13	123.28	--
Mtwara	11	88.58	80.51	--

3.2 Quantities of Imported Liquid Petroleum Products

The main imported petroleum products are petrol, diesel, kerosene, Jet A-1, and HFO. In 2022, a total of 8,189,294,333 litres were imported which is a 16% increase compared to 7,070,146,001 litres imported in 2021. Imports for the local market account for 51% of the total imports and the remaining 49% were imports for transit to neighbouring countries as depicted in **Figure 2**.

Figure 2: Local vs Transit Petroleum Products Imports in 2021 and 2022

Imports for local consumption increased by 5.6% while imports for transit increased by 29% when compared to the quantities imported in 2021 as shown in Table 5 below. The increase in imports is attributed mainly to increased economic activities.

Table 5: Total Local and Transit Products Imports in 2021 and 2022 (in Litres)

Year	Local Imports	Transit Imports	Total
2021	3,951,498,476	3,118,647,525	7,070,146,001
2022	4,174,681,137	4,014,613,196	8,189,294,333
% Change	5.6%	29%	16%

As shown in **Table 6**, imports of kerosene have continued to decline due to measures that are taken to curb adulteration and a decline in consumption of the product as consumers have switched to alternative energy sources. Monthly imported quantities for each petroleum product for the local and transit markets are indicated in **Appendix 5**.

Table 6: Total Local and Transit Imports in 2021 and 2022 by products (in Litres)

		2021	2022	% Change
Local Imports	Diesel	2,147,613,783	2,466,635,151	15%
	Petrol	1,603,624,453	1,493,689,223	-7%
	Kerosene	20,085,277	7,504,101	-63%
	Jet A-1	162,172,606	188,175,209	16%
	HFO	24,239,147	26,169,652	8%
Transit Imports	Diesel	1,886,886,591	2,455,212,345	30%
	Petrol	1,078,857,760	1,331,611,507	23%
	Jet A-1/ Kerosene	131,170,115	210,758,351	61%
	HFO	15,496,268	9,538,794	-38%

3.3 Consumption of Liquid Petroleum Products

In the year 2022, a total of 4,352,953,408 litres of liquid petroleum products was consumed, equivalent to a 5.4% increase when compared to 4,131,562,982 litres consumed in year 2021 as depicted in **Table 7**.

Table 7: Petroleum Product Consumption in years 2021 and 2022 (in litres)

YEAR	Diesel	Petrol	Kerosene	HFO	Jet A-1	IDO	TOTAL
2021	2,316,857,445	1,598,710,823	21,809,310	29,717,374	164,376,685	89,324	4,131,562,982
2022	2,484,898,134	1,593,770,234	14,731,473	36,835,934	222,717,633	45,000	4,352,953,408
% Change	7.3%	-0.3%	-32.5%	24.0%	35.5%	-49.6%	5.4%

The main business segments that consume petroleum products, include transportation, industries, construction, mining, and aviation. The quantity of petroleum products consumed by each business segment is as shown in **Table 8** below. In the year under review, the retail segment (transportation) consumed 48% of the total consumed petroleum products and the direct customers' segment (agriculture & industries) consumed 43%. Mining and aviation segments consumed 4% and 5% of the total consumption of products respectively.

Table 8: Petroleum Consumption by Category for the year 2022

Business Segment	Diesel	Petrol	Kerosene	HFO	Jet A-1	IDO	TOTAL
Retail Stations (Transportation)	1,146,216,702	956,968,910	5,643,744	-	-	-	2,108,829,356
Direct Customers (Industry & Agriculture)	1,177,219,406	636,801,324	9,087,729	27,923,146	-	45,000	1,851,076,605
Power Generation	-	-	-	-	-	-	-
Others (including Mining)	161,462,026	-	-	8,912,788	-	-	170,374,814
Aviation	-	-	-	-	222,717,633	-	222,717,633
TOTAL	2,484,898,134	1,593,770,234	14,731,473	36,835,934	222,717,633	45,000	4,352,998,408

3.3.1 Petroleum Products Sales per Region

During the period under review, the annual sales of petroleum products at retail stations and consumer installations totalled 3,930,935,592 litres. Based on the number of retail stations available in each region, the annual average sales per station was 1,739,352 litres and the highest sales per petrol station were attained in Dar es Salaam followed by Iringa, Arusha, Coast, Mwanza, and Dodoma. **Table 9** shows the average sales per petrol station in each region.

Table 9: Average Annual Sales per Petrol Station in each Region

Region	Average Consumption per Region (Litres)	No. of Petrol Stations per Region	Average Annual Sales per Petrol Station (Litres)
Arusha	272,894,683	117	2,332,433
Coast	273,405,834	138	1,981,202
Dar es Salaam	1,240,979,403	375	3,309,278
Dodoma	228,988,925	113	2,026,451
Geita	50,439,540	79	638,475
Iringa	125,913,236	51	2,468,887
Kagera	110,143,576	106	1,039,090
Katavi	20,565,160	20	1,028,258

Kilimanjaro	108,910,295	111	981,174
Lindi	33,594,679	52	646,052
Manyara	27,550,162	59	466,952
Mara	74,618,031	75	994,907
Mbeya	177,576,322	106	1,675,248
Morogoro	160,138,313	110	1,455,803
Mtwara	85,936,159	61	1,408,789
Mwanza	300,643,690	143	2,102,403
Njombe	75,981,339	50	1,519,627
Rukwa	31,619,656	25	1,264,786
Ruvuma	69,515,125	49	1,418,676
Shinyanga	106,540,040	87	1,224,598
Simiyu	15,196,089	35	434,174
Singida	52,957,122	43	1,231,561
Songwe	33,867,694	46	736,254
Tabora	50,863,093	61	833,821
Tanga	146,344,921	89	1,644,325
Grand Total	3,930,935,592	2,260	

3.3.2 Aviation Fuel Consumption and Distribution

Aviation fuel was mainly supplied by three Oil Marketing Companies (OMCs). These are Puma Energy Ltd, Total (T) Ltd, and Oilcom (T) Ltd. A total of 190,772,000 litres of Jet A-1 and 443,000 litres of Aviation gasoline (AvGas) were distributed and consumed at various airports in Tanzania. Puma Energy continued to be the only supplier of AvGas.

Julius Nyerere International Airport (JNIA) accounted for 76.2% of the Jet A-1 consumed in the country due to its higher air traffic compared to other airports, followed by Kilimanjaro International Airport (KIA), which consumed 16.7%. The consumption of Jet A-1 by airports is indicated in **Figure 3**.

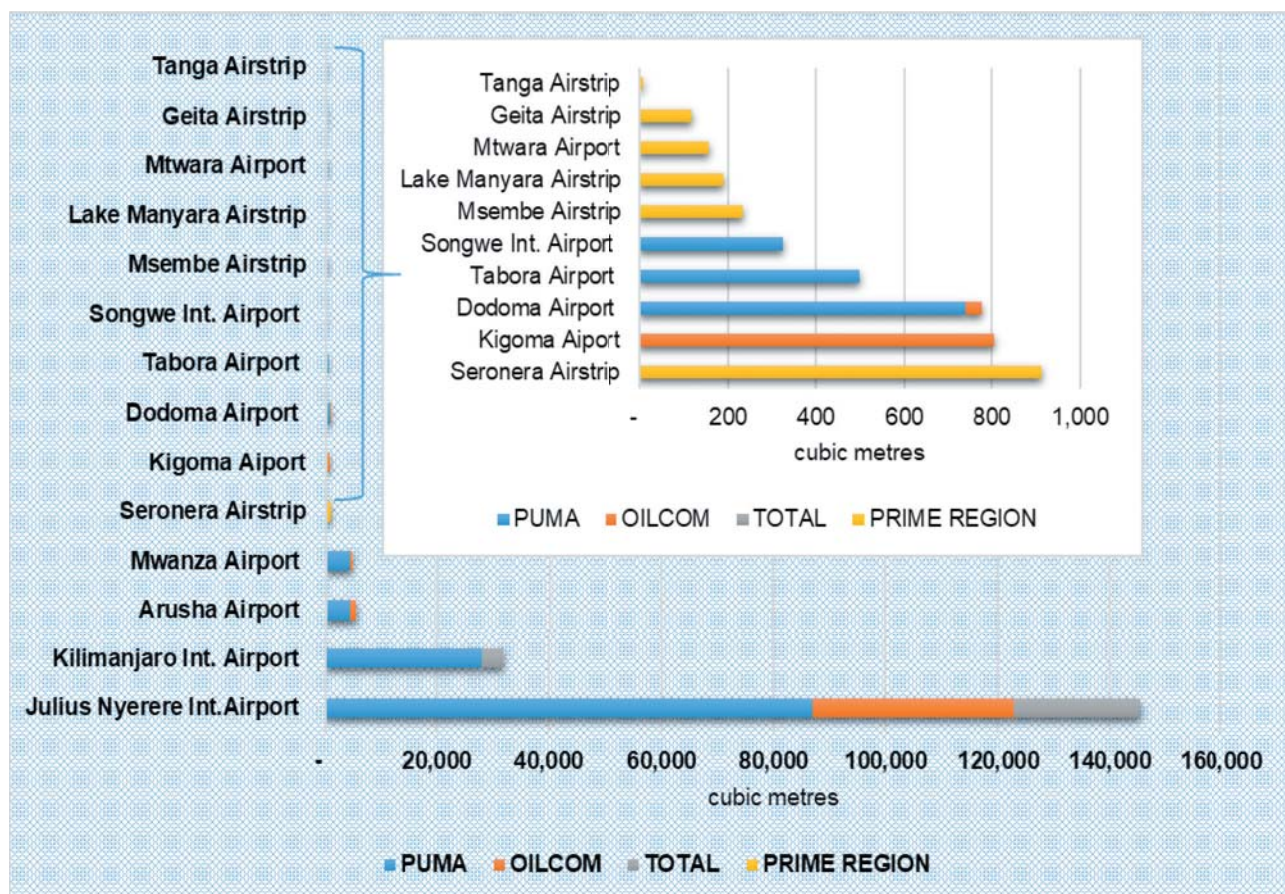

Figure 3: Jet A-1 Consumption and Distribution by Airport and Company

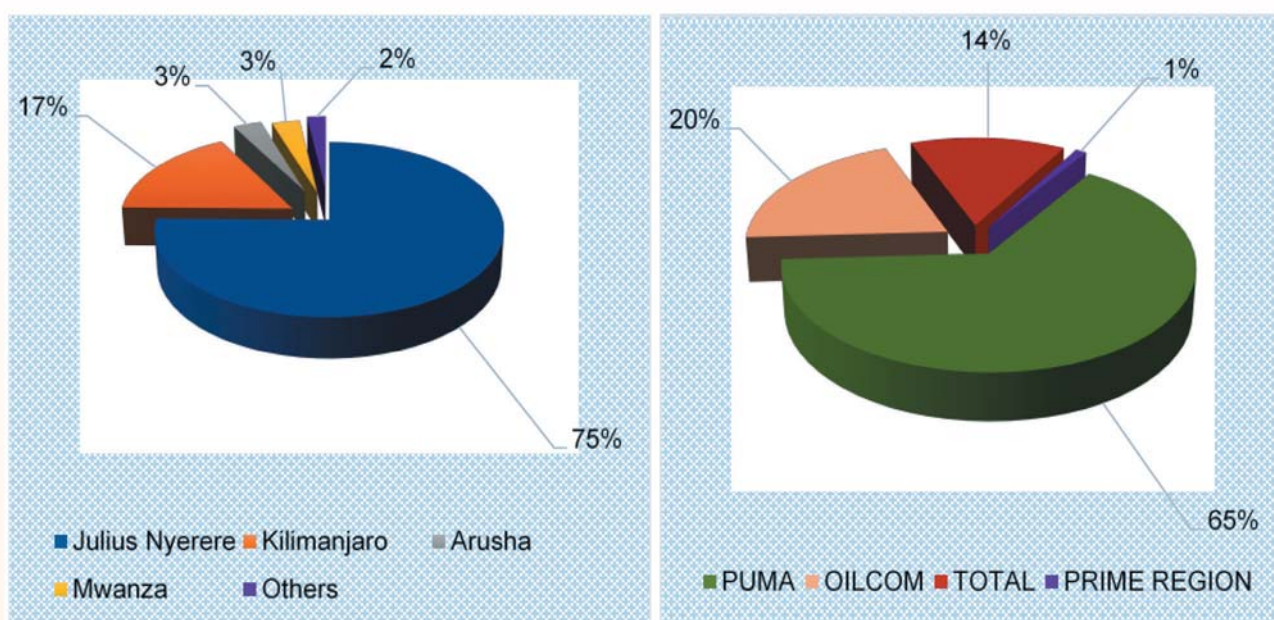

Figure 4: Jet A-1 Percentage of Consumption by Airport and Market share

3.4 Stock Availability

Pursuant to regulation 6 of the Petroleum (General) Regulations of 2011, OMCs are required to maintain at least 15 days' stock of petroleum products at all times based on their market shares. EWURA monitors the requirement of the aforementioned regulation by checking the OMCs' stock balances every week and ensuring sufficient products are procured through BPS every month. The objective is to ensure the country has sufficient stock of petroleum products at all times.

In the year under review, the country had sufficient stocks to meet the demand for more than 15 days as indicated in Figure 5.

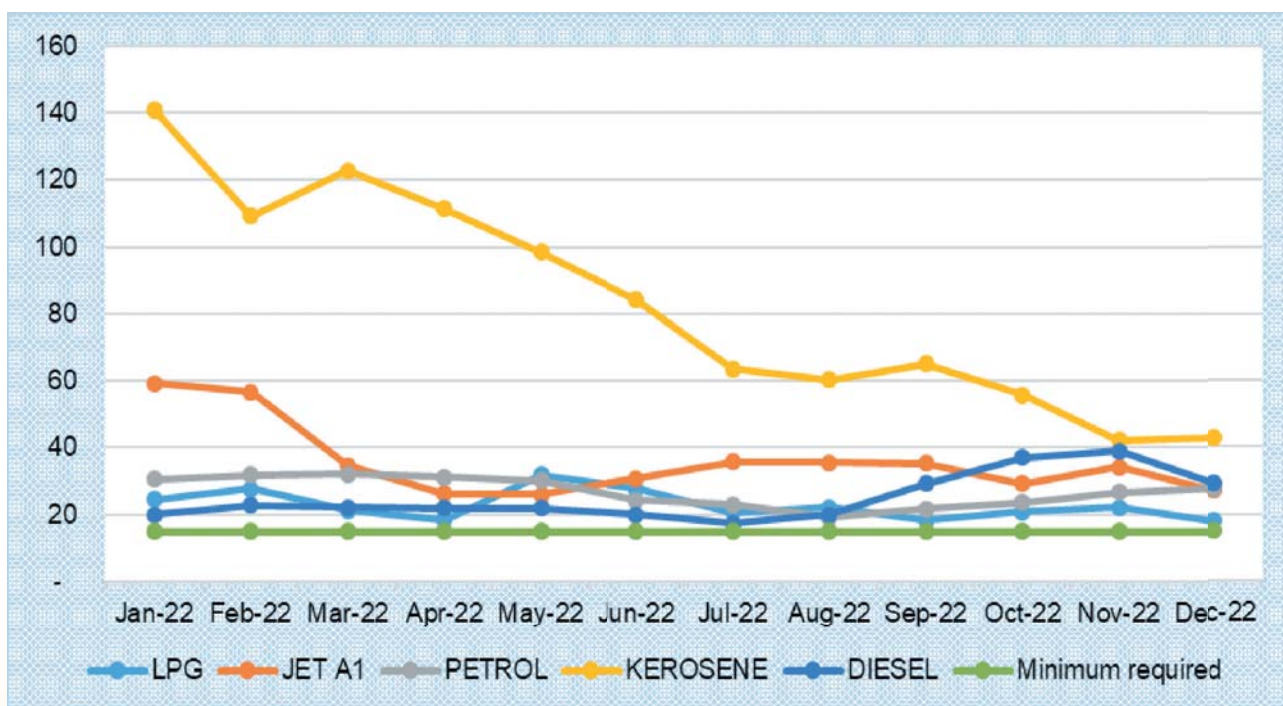

Figure 5: Monthly Average Stock Days of Petroleum Products in 2022

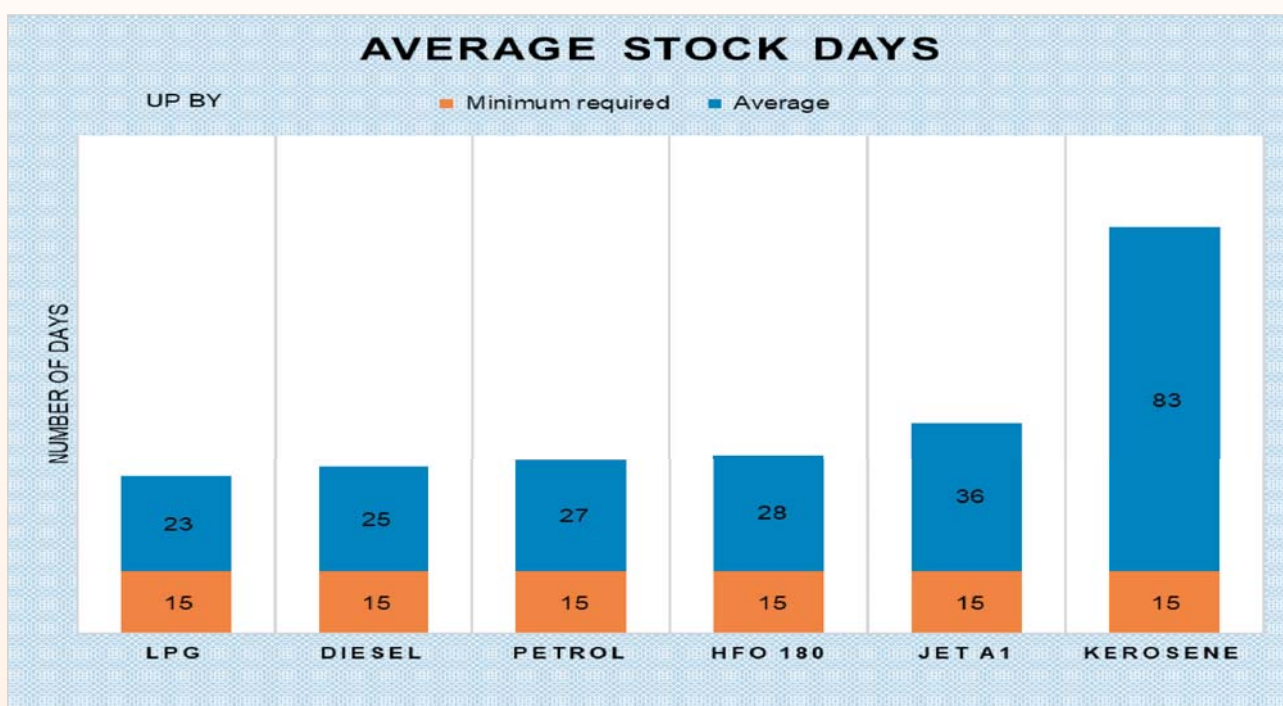

Figure 6: Average Stock Days of Petroleum Products in 2022

4. PRICES OF LIQUID PETROLEUM PRODUCTS

Prices of petroleum products are determined and published in accordance with Section 166 of the Petroleum Act, Cap 392. Petroleum wholesale and retail cap prices for diesel, petrol, and kerosene are set every month as required by the Energy and Water Utilities Regulatory Authority (Petroleum Products Price Setting) Rules.

4.1. Trend of World Prices for Petroleum Products

Most of the petroleum products that are supplied in Tanzania are sourced from the Arab Gulf with some of the products being sourced from Oman and India. It is in this regard that the FOB reference prices in the Shipping and Supply Contracts for supply of petroleum products through BPS are based on the Arabian Gulf (AG) market prices as published by Platts.

4.1.1 World Market Crude Oil Prices

In the first half of 2022, the market observed a high increase in crude oil prices following production cuts by OPEC and further reduction in world oil inventories after sanctions were imposed against Russia due to the Russia-Ukraine war. At the same time, demand for oil continued to increase as the world was recovering from the COVID-19 pandemic. In the second half of the year, crude oil prices declined mainly due to a decrease in demand from China as the country was implementing measures to contain emerging COVID-19 cases. Therefore, in 2022, the average price of crude oil stood at USD 99 per barrel compared to USD 70.76 per barrel in 2021, equivalent to an increase of 40%. The trend of crude oil prices is shown in **Figure 7**.

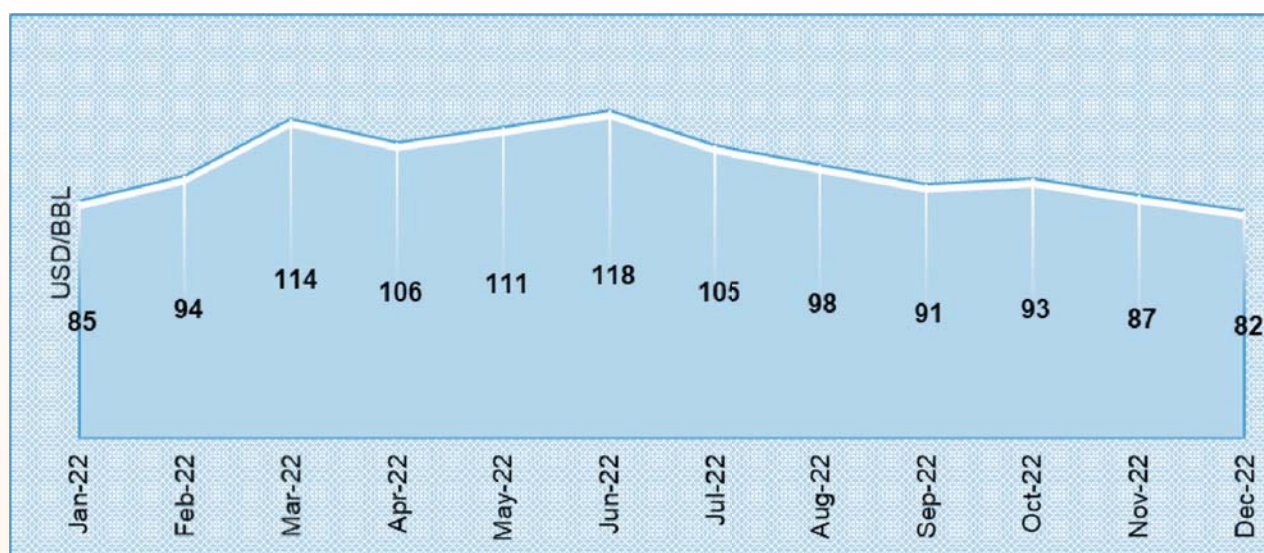

Figure 7: The Trend of Brent Crude Oil Prices in 2022

4.1.2 World Refined Petroleum Products Market Prices

In the year under review, the average FOB prices for refined petroleum products in the world market recorded an increasing trend. The average prices for petrol, diesel, and kerosene were USD 912/MT, USD 972/MT, and USD 962/MT, which is equivalent to an increase of 36%, 69%, and 66% respectively when compared to the average FOB prices of 2021. The world market FOB prices for petrol, diesel, and kerosene/ Jet A-1 are shown in **Table 10** and **Figure 8**.

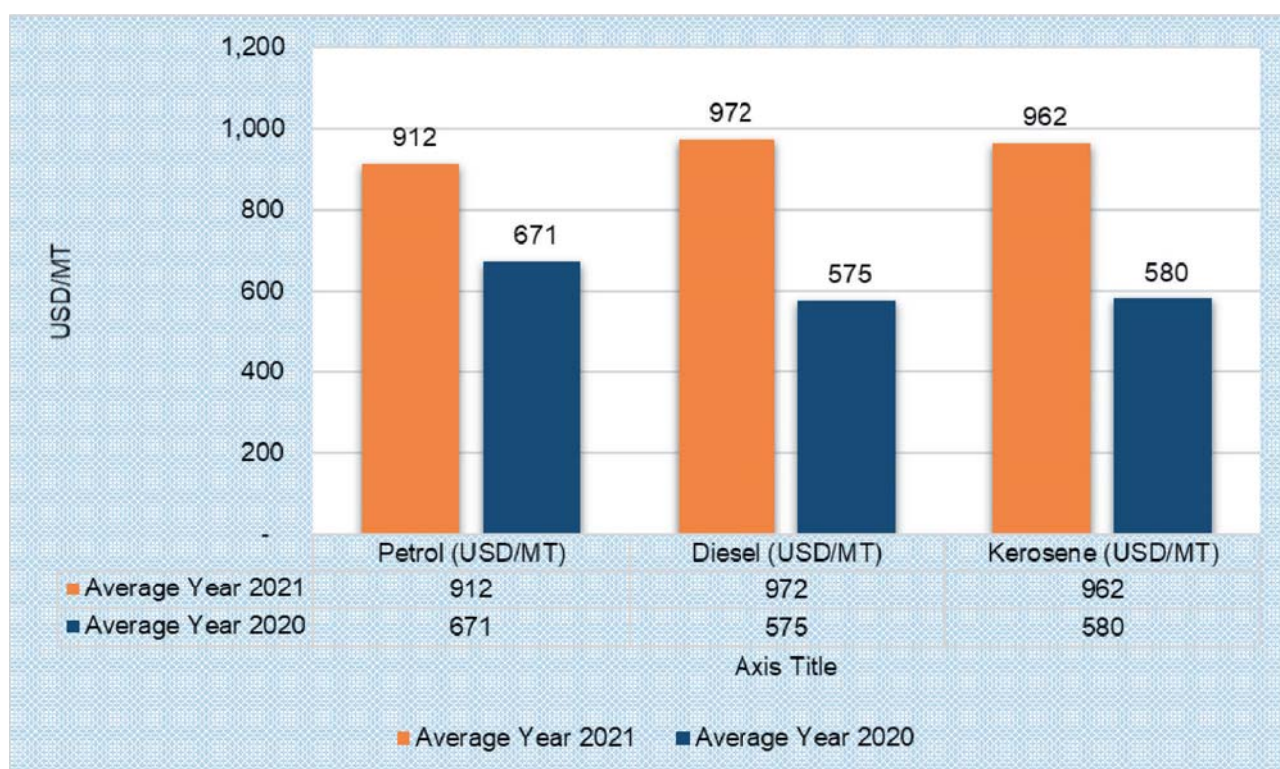

Figure 8: Average World Market Refined Petroleum Products FOB Price Trends in year 2021 and 2022

Table 10: Average World Market Prices of Refined Petroleum Products FOB in 2022 (in USD/MT)

Month	Petrol	Diesel	Kerosene
January	808	738	743
February	912	826	826
March	1,069	1,040	1,038
April	1,030	1,094	1,044

Average Price in 2021	671	575	580
% Change	36%	69%	66%

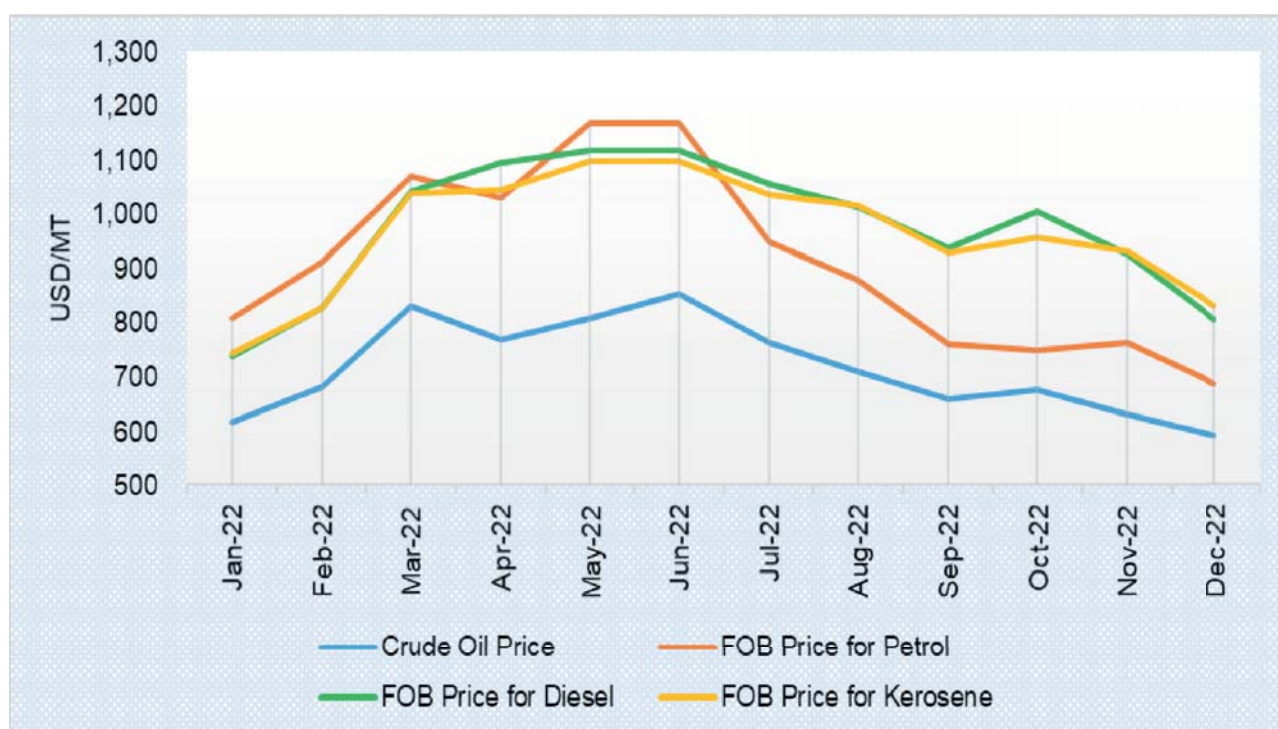

Figure 9: The Trend of Brent Crude Oil Prices vs FOB Prices in the year 2022

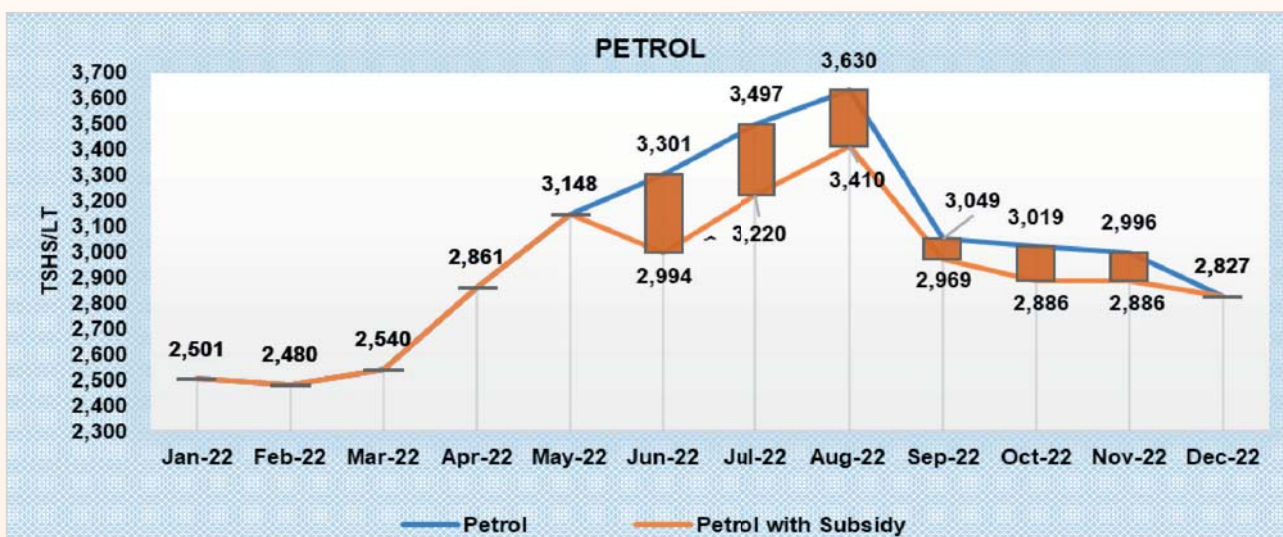

4.2. Domestic Petroleum Product Prices

The domestic wholesale cap prices of petrol, diesel and kerosene at each petroleum products receiving port and the retail cap prices for all districts in Mainland Tanzania were published on a monthly basis. The prices were determined by considering the product costs at the receiving ports. These costs included landed costs, local costs, Government taxes, local transport costs and margins of wholesalers and retailers to cover operating costs and a return on investment.

Due to the high increase in prices of petroleum products in the year 2022, the Government of Tanzania provided a subsidy to lower the prices of petrol and diesel from June 2022 to December 2022. In the year 2022, the average pump prices of petrol and diesel in Dar es Salaam would have been TShs 2,987 per litre and TShs 3,078 per litre respectively. After the provision of subsidy, the average pump prices were TShs 2,894 per litre, TShs 2,927 per litre and TShs 3,009 per litre for petrol, diesel and kerosene respectively, which is an increase of 29%, 39% and 49% when compared to the average pump prices in 2021. **Table 11** provides the monthly pump prices for Dar es Salaam and **Figure 10** shows the average retail pump prices for Dar es Salaam in 2021 and 2022.

Table 11: Monthly Pump Prices in Dar es Salaam in 2022 (TShs/Litre)

	Petrol		Diesel		Kerosene
	Price without Subsidy	Price with Subsidy	Price without Subsidy	Price with Subsidy	Price without Subsidy

**Figure 10: Average Pump Prices for Dar es Salaam in 2021 and 2022**

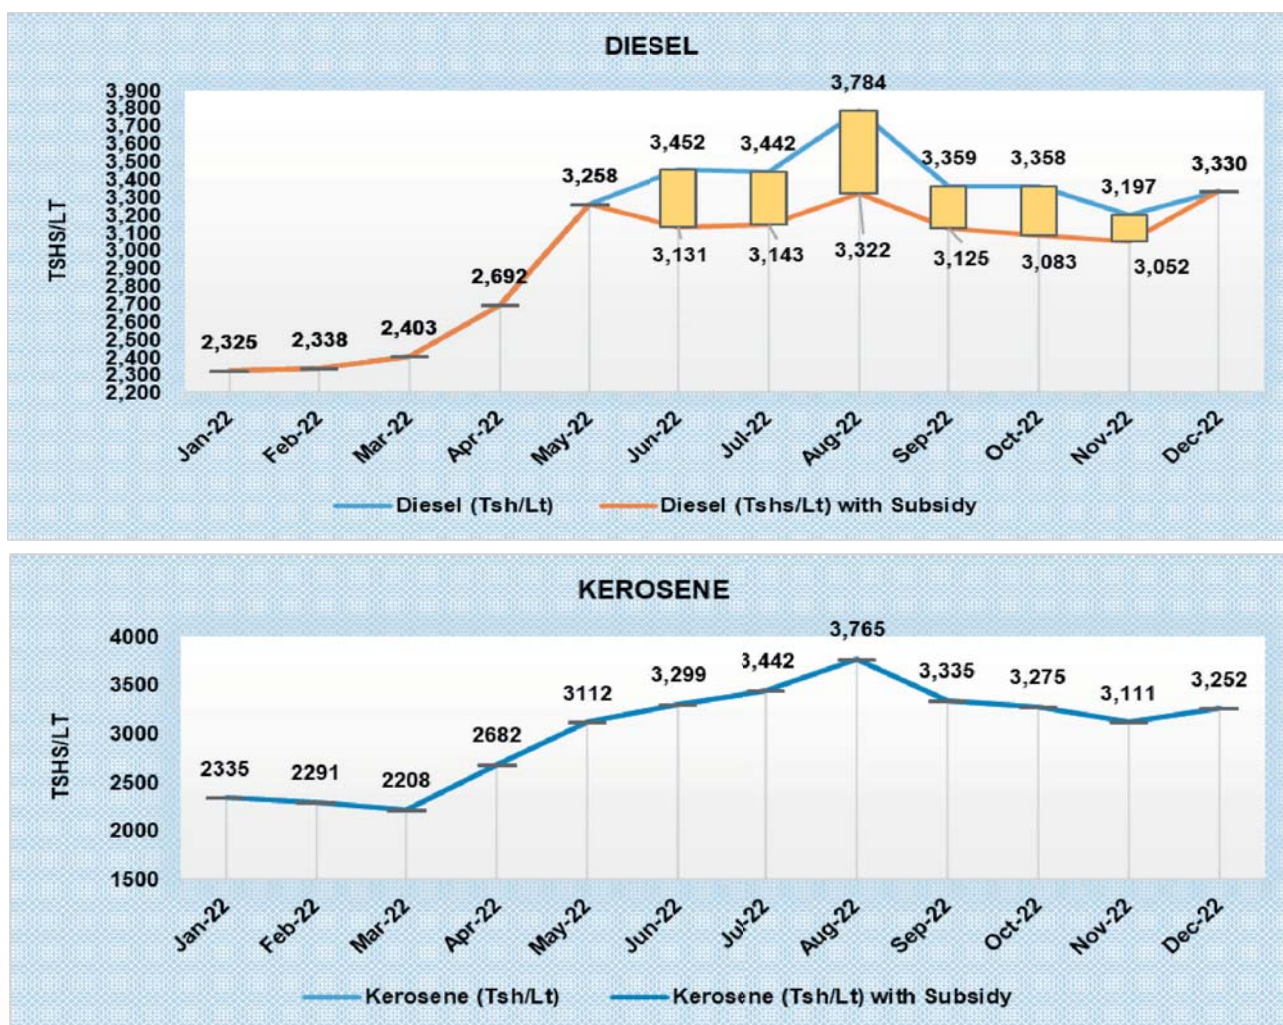

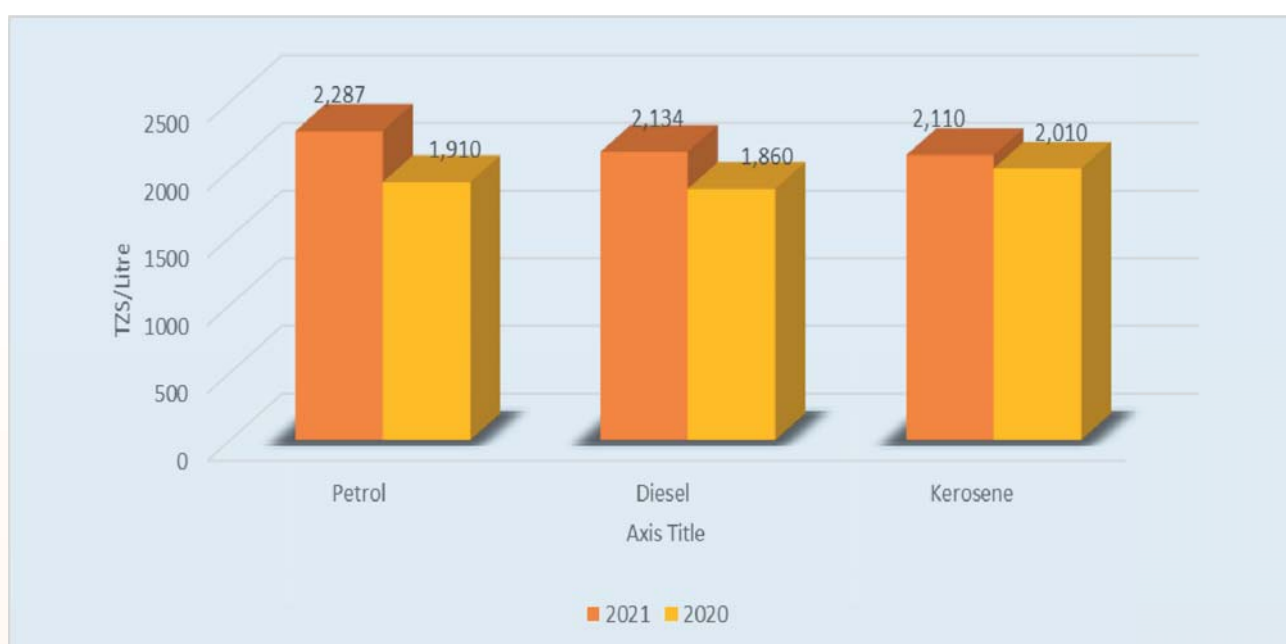

Figure 11: Trend of Average Pump Prices for Dar es Salaam for the year 2022

Tanga port continued to receive imports of petrol and diesel only. Kerosene was sourced from Dar es Salaam and thus prices of kerosene for the Northern regions are based on the cost of products received through Dar es Salaam Port and the bridging cost to the respective regions.

During the period under review, the average pump prices of petrol and diesel in Tanga would have been TShs 2,965 per litre and TShs 3,149 per litre respectively. After the provision of subsidy, the average pump prices were TShs 2,892 per litre, TShs 2,950 per litre and TShs 3,055 per litre for petrol, diesel and kerosene respectively, which is an increase of 26%, 37% and 45% when compared to the average pump prices in 2021. **Table 12** provides the monthly pump prices for Tanga and **Figure 12** indicates the average retail pump prices for Tanga in 2021 and 2022.

Table 12: Monthly Pump Prices for Tanga in the year 2022 (in TShs/Litre)

**Figure 12: Average Pump Prices for Tanga in 2021 and 2022**

Mtwara port also continued to receive imports of petrol and diesel only. Kerosene was sourced from Dar es Salaam and thus prices of kerosene for the Southern regions are based on the cost of products received through Dar es Salaam Port and the bridging cost to the respective regions.

During the period under review, the average pump prices of petrol and diesel in Mtwara would have been TShs 2,998 per litre and TShs 3,182 per litre respectively. After the provision of subsidy, the average pump prices were TShs 2,901 per litre, TShs 2,989 per litre and TShs 3,081 per litre for petrol, diesel and kerosene respectively, which is an increase of 28%, 41% and 47% when compared to the average pump prices in 2021. **Table 13** provides the monthly pump prices for Mtwara and **Figure 13** presents the average pump prices for Mtwara in 2021 and 2022.

Table 13: Monthly Pump Price in Mtwara in the year 2022 (in TShs/Litre)

Month	Petrol	Petrol with Subsidy	Diesel	Diesel with Subsidy	Kerosene

% Change	32%		50%		47%

**Figure 13: Average Pump Prices for Mtwara in 2021 and 2022**

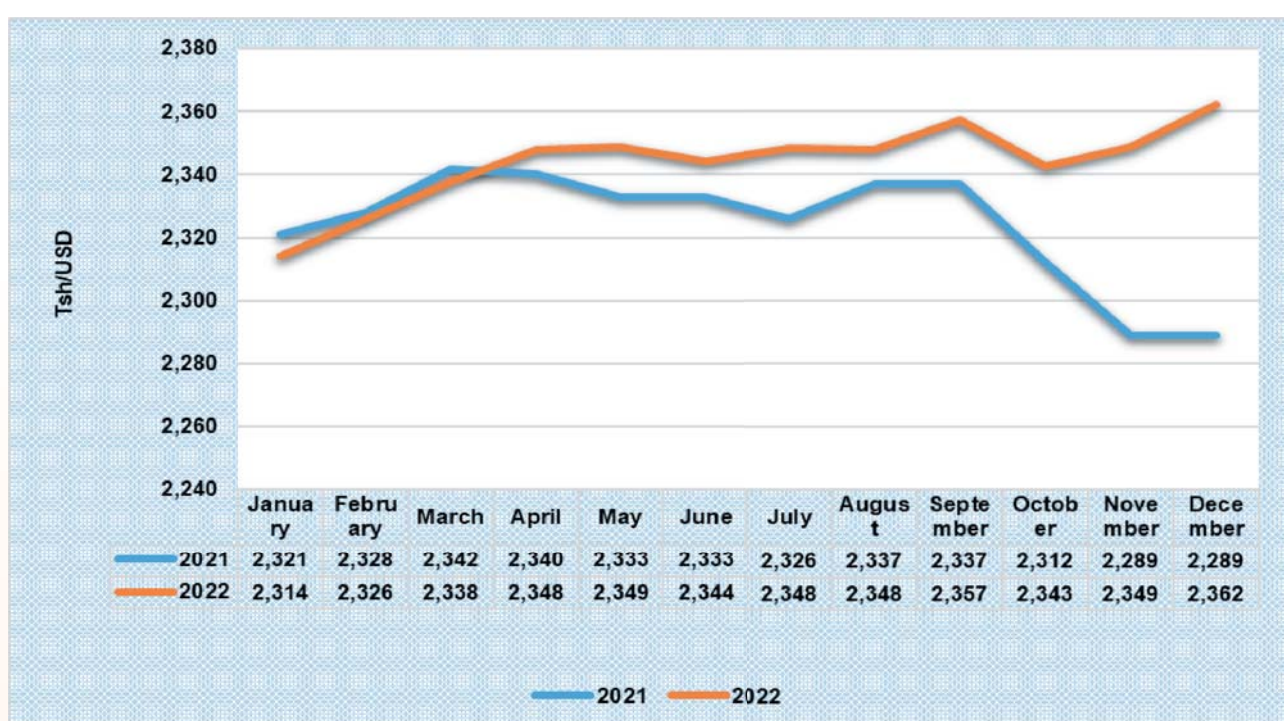

4.2.1 Exchange Rate

The currency used in the procurement of petroleum products is the United States Dollar. As the products are sold in the Tanzanian market in the local currency, an exchange rate is determined each month during the computation of petroleum products prices to convert the foreign currency to the local currency. In the determination of the exchange rate, EWURA sources from the Bank of Tanzania the exchange rate obtained by Oil Marketing Companies when purchasing Dollars to pay for the imported petroleum products.

During the period under review, the average exchange rate was TShs 2,344 per USD which is a 0.86% depreciation of the Shilling against the Dollar compared to the exchange rate of TShs 2,324 per USD in 2021. **Table 14** and **Figure 14** present the exchange rates in 2020 and 2021.

Table 14: Monthly Exchange Rates trend in 2021 and 2022 (TShs/USD)

Month	2021	2022
January	2,321	2,314
February	2,328	2,326

4.2.2 Demurrage Costs

Demurrage costs are the charges payable to petroleum suppliers due to delays in discharging petroleum products based on an agreed time as specified in the shipping and supply contracts. **Figure 15** shows the trend of unit demurrage costs and demurrage days for the three ports. Dar es Salaam Port has the highest demurrage days due to the congestion of vessels mainly at KOJ1. On the other hand, demurrage days at Tanga Port were the lowest because there is no congestion at the port. Most of the delays are due to waiting for laboratory results that are processed in Dar es Salaam after sampling from the arrived vessels in Mtwara and Tanga. TBS has established a laboratory in Mtwara and they are expecting to establish one in Tanga as well in order eliminate the time taken to transport samples to Dar es Salaam and hence reduce demurrage costs.

Table 15: The Average Demurrage Cost and Days for the Three Ports in 2022

	DSM	TANGA			MTWARA	
	DEMURRAGE COST (USD/MT)	DAYS	DEMURRAGE COST (USD/MT)	DAYS	DEMURRAGE COST (USD/MT)	DAYS

**Figure 15: Demurrage Days and Unit Demurrage Cost at Dar es Salaam, Tanga and Mtwara ports**

The average unit demurrage costs at Dar es Salaam Port in 2022 is 3.35 USD/MT, which is equal to the average demurrage cost in 2021. However, the demurrage days slightly increased to 9.71 compared to 9.46 days that was recorded in 2021. The changes are indicated in **Figure 16**.

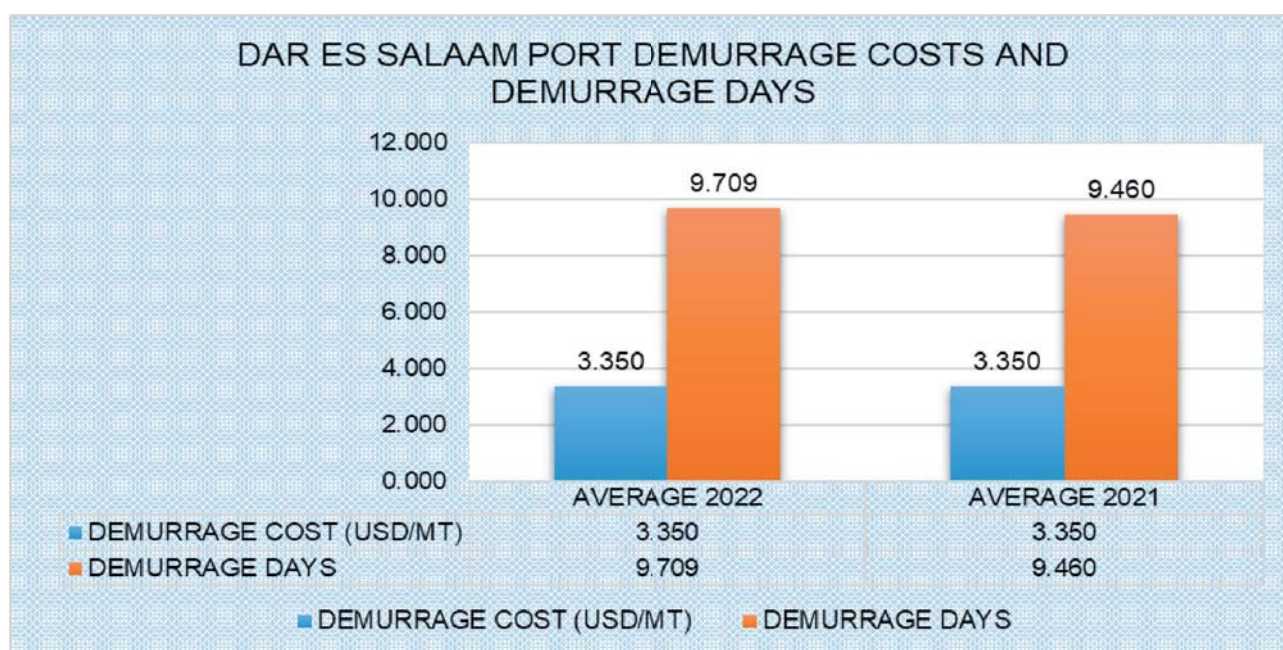

Figure 16: DSM Port Demurrage Cost (USD/MT) and Demurrage Days.

The average demurrage costs at Tanga Port decreased from USD/MT 1.96 in 2021 to USD/MT 0.58 in 2022, equivalent to decrease by 71%. Furthermore, the demurrage days, decreased from USD/MT 2.69 to USD/MT 1.09.

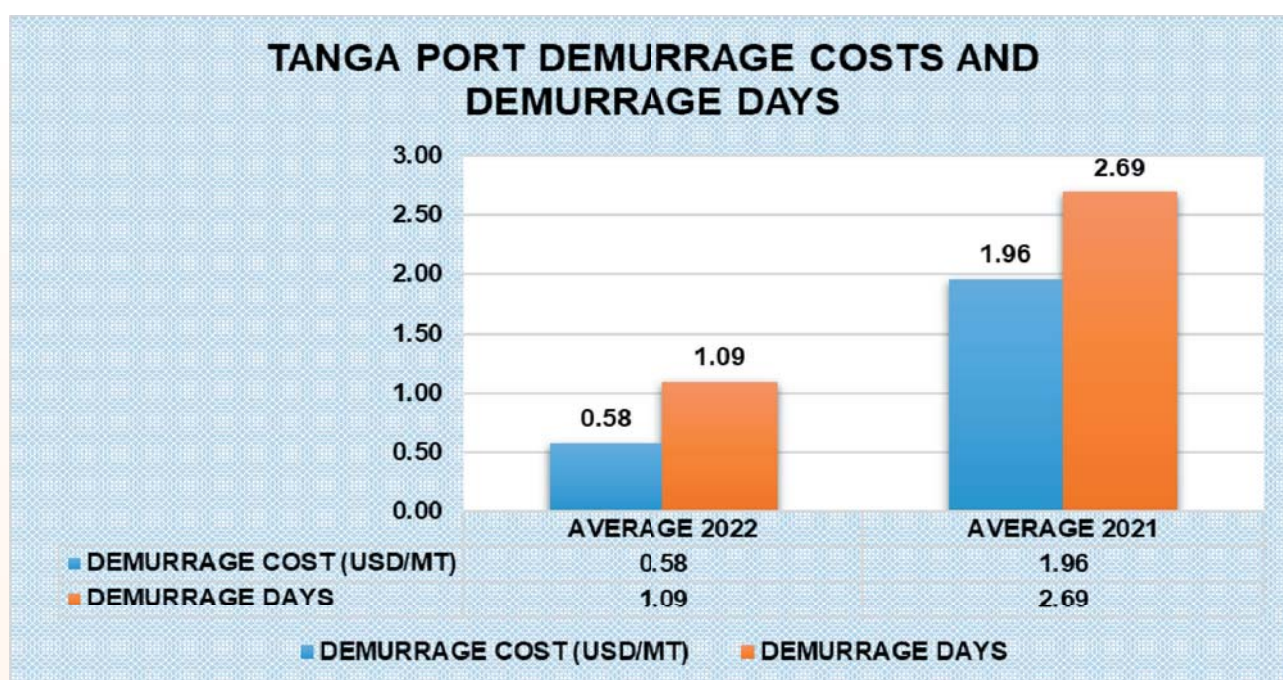

Figure 17: Tanga Port Demurrage Cost (USD/MT) and Demurrage Days

The average demurrage cost per unit at Mtwara Port decreased from USD/MT 7.86 in 2021 to USD/MT 5.42 in 2022. On the other hand, demurrage days have also decreased from USD/MT 2.16 in 2021 to USD/MT 2.16 days in 2022.

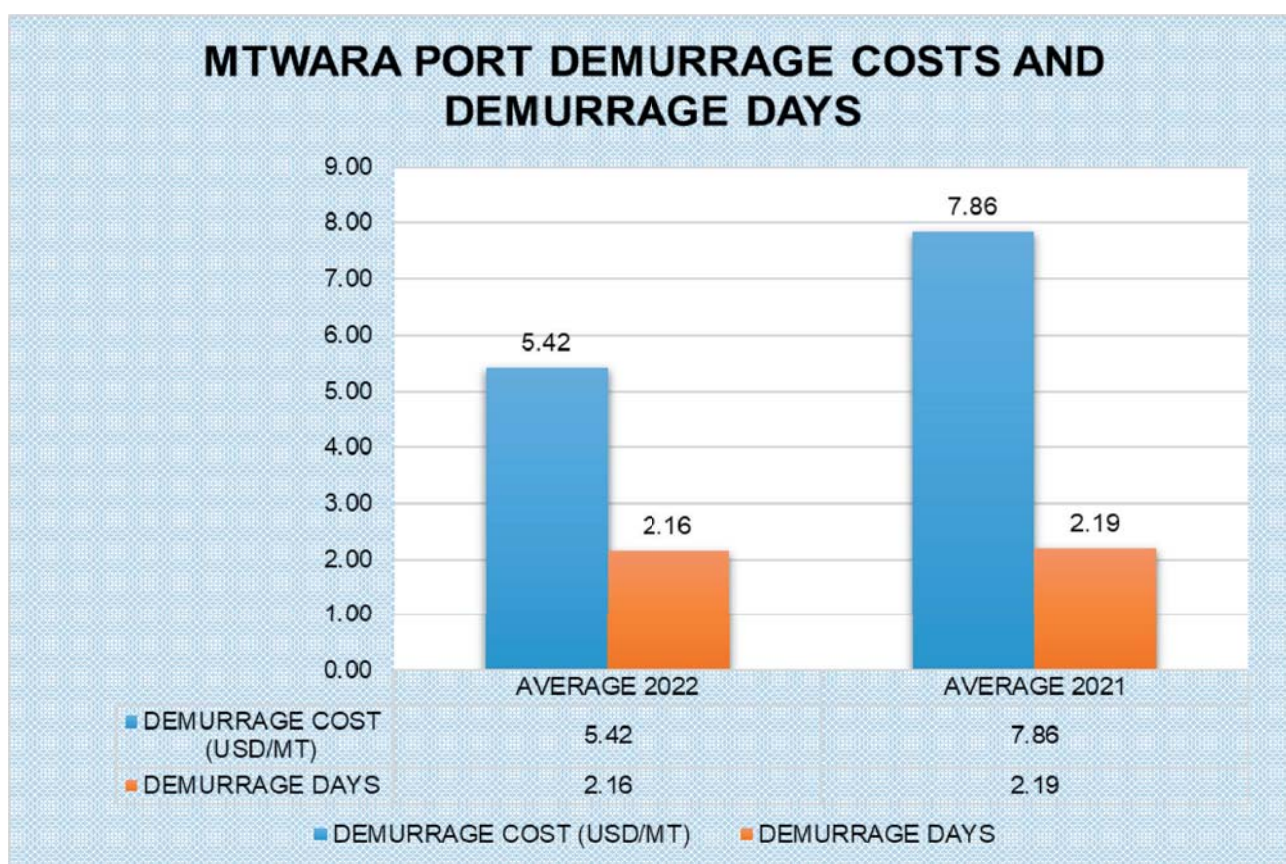

Figure 18: Mtwara Port Demurrage Cost (USD/MT) and Demurrage Days

4.2.3 Relationship between FOB prices and local pump prices

Tanzania is a net importer of petroleum products as no product is produced locally. This being the case, fluctuations of refined petroleum product prices in the world market ultimately affect local pump prices. The relationship between FOB prices of refined petroleum products and local pump prices during the period under review is shown in **Figure 19** to **Figure 21**. The trend shows that local pump prices for diesel, petrol, and kerosene in 2022 were impacted by changes in world market prices.

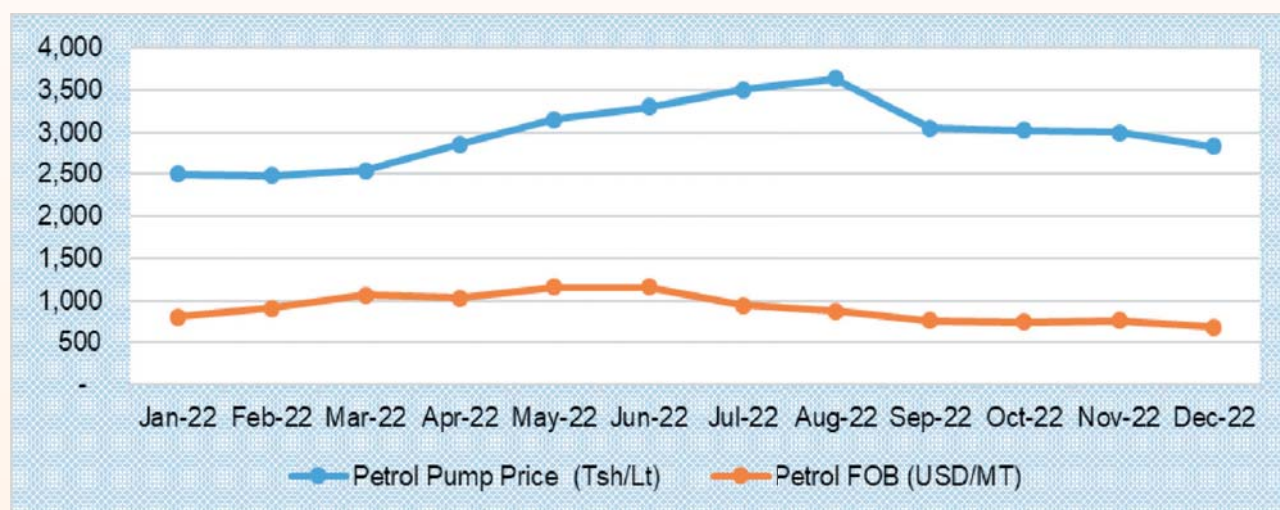

Figure 19: Relationship between Petrol FOB and Pump Prices in 2022

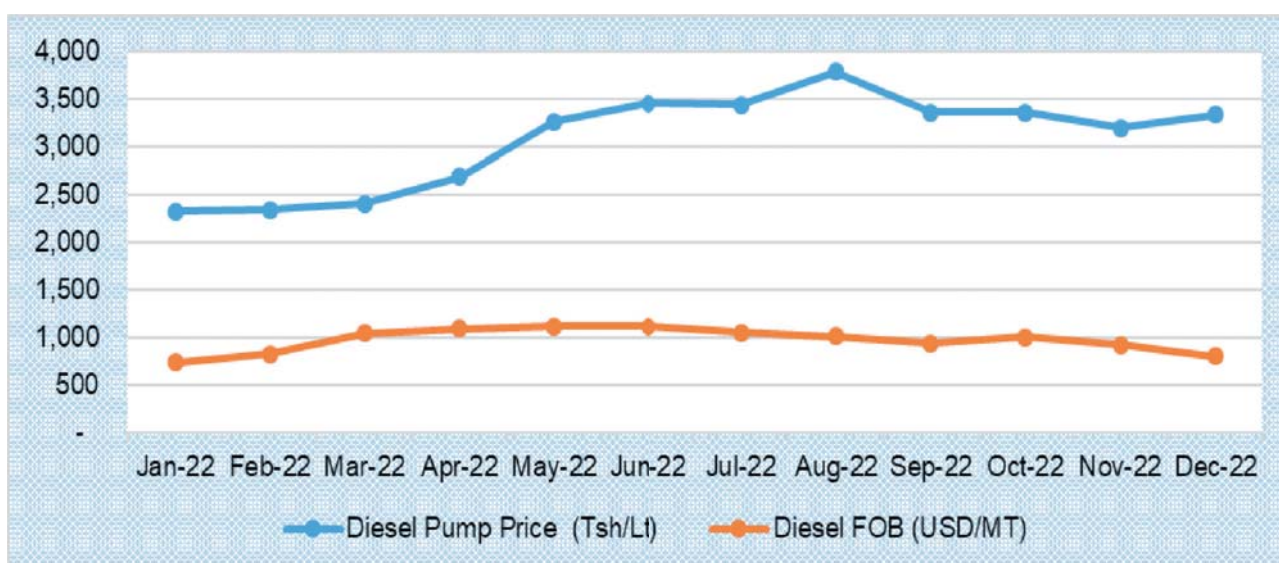

Figure 20: Relationship between Diesel FOB and Pump Prices in 2022

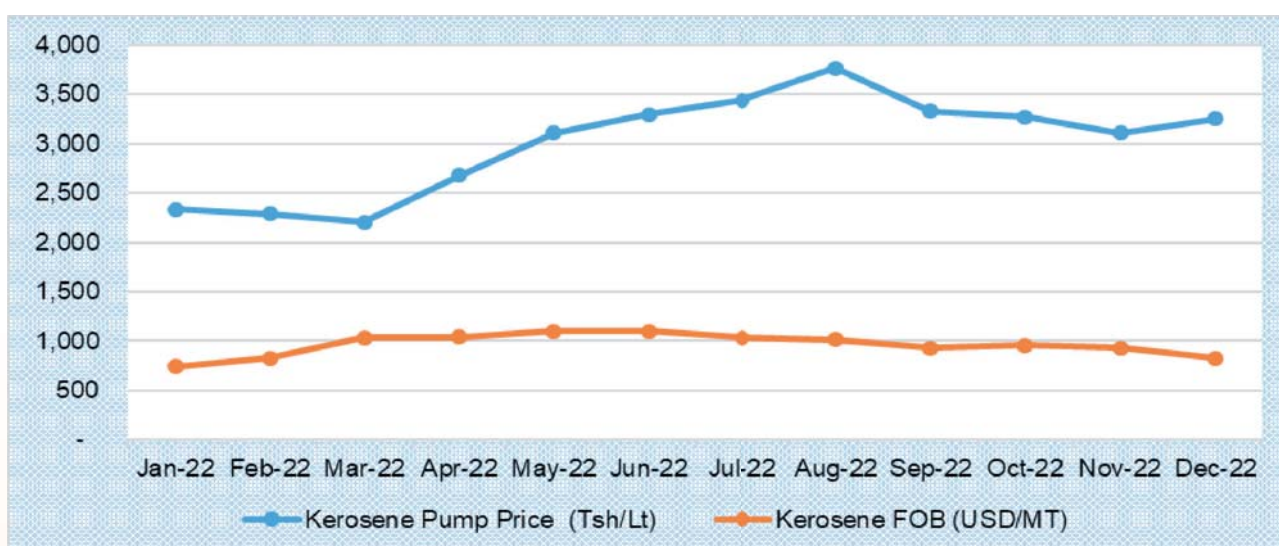

Figure 21: Relationship between Kerosene FOB and Pump Prices in 2022

4.3. Market Share of Oil Marketing Companies

The performance of Oil Marketing companies is monitored by the Authority to view the level of competition in the industry. Oil marketing companies are free to strategise their business operations in all dimensions provided that they do not breach the rules and licence terms and conditions. Operators are allowed to enter or exit the market, merging, acquisition, re-branding, or business promotions. Anti-competitive practices, including distortion of fuel quality standards, selling petroleum products beyond cap prices, and breaching HSE practices were restricted and legal action was taken against dishonest players.

In the year under review, the petroleum market in the country remained competitive and fairly distributed among different Oil Marketing Companies (OMCs). Five dominating OMCs occupied 52.5% of the total market share. These are Puma Energy Tanzania Ltd (15.9%), Total Energies Tanzania Ltd (12.3%), Oryx Energies (8.5%), Mansoor Industries Limited (8.0%), and Gulf Bulk Petroleum Tanzania Ltd (7.8%), while the remaining OMCs share the remaining portion. Factors attributed to dominating companies occupying a big market share include ownership of the downstream supply chain, customers' brand loyalty, distribution of petroleum products, and supply contracts with big consumers such as industries, mining, and agriculture companies. The market share of all OMCs is shown in **Table 16**.

Table 16: OMCs Market Share for Year 2022

5. INFRASTRUCTURE AND SUPPLY OF LIQUEFIED PETROLEUM GAS

5.1. LPG Facilities

The main LPG facilities include receiving and storage facilities, LPG cylinder re-filling plants, and LPG cylinder distribution warehouses. LPG is primarily imported into Tanzania through the ports of Dar es Salaam and Tanga.

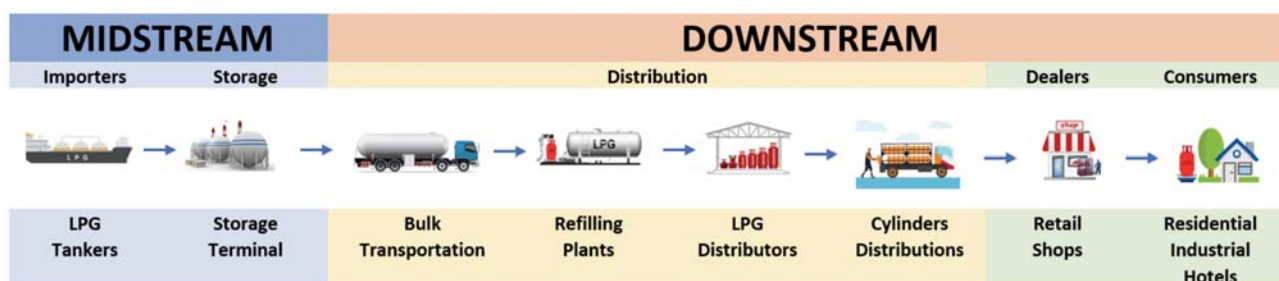

Figure 22: LPG Supply Chain in Tanzania Mainland

In the year 2022, there was no new investment in LPG-receiving facilities. Therefore, the total storage capacity for LPG receiving facilities in Dar es Salaam and Tanga remained at 15,750 MT as presented in **Table 17**. The number of upcountry LPG storage and filling plants have increased with the storage capacity increasing from 1,910 MT in the year 2021 to 2,055 MT in the year 2022 as shown in **Table 18**.

Table 17: A List of LPG Receiving Facilities in Dar es Salaam and Tanga as of 31st December 2022

S/N	Name	Physical Location	Capacity (MT)
1	Taifa Gas Tanzania Limited – Kigamboni LPG Facility	Vijibweni Industrial area, Kigamboni, Dar es Salaam	7,450
2	Oryx Energies Tanzania Limited – Kigamboni LPG Facility	Vijibweni Industrial area, Kigamboni, Dar es Salaam	3,100
3	Manjis Gas Supply Limited – Kigamboni LPG Facility	Vijibweni Industrial area, Kigamboni, Dar es Salaam	2,900
4	Lake Gas Limited – Tanga LPG Facility	Chumbageni, Tanga	1,050
5	Lake Gas Limited - Kigamboni LPG Facility	Vijibweni Industrial area, Kigamboni, Dar es Salaam	750
6	Oilcom Tanzania Limited - Kurasini LPG Facility	Kurasini, Dar es Salaam	500
Grand Total Capacity			15,750

5.2. LPG Imports

In the year under review, the LPG business segment continued to grow with LPG imports increasing by 1% to 250,200 MT compared to 248,216 MT imported in 2021. The Government and LPG marketing companies continued to create awareness to the public on the importance and convenience of using LPG instead of traditional fuels such as charcoal and firewood. In order to increase the consumption of LPG especially for cooking in households, LPG is available in different cylinder sizes from 3kg to 15kg cylinders. For the convenience of cooking in restaurants, cylinders of up to 40kg are available in the market. **Table 19** presents LPG imports in 2022 whereas **Figure 23** indicates the LPG imports trend from 2010 to 2022.

% Change	0.8%

**Figure 23: LPG Imports from 2010 to 2022**

5.3. Monitoring Market Share of Liquefied Petroleum Gas Marketing Companies

The Authority continued to monitor the performance of LMCs in terms of Liquefied Petroleum Gas (LPG) sales levels attained by each company in the market. As shown in **Table 20**, in the year under review, Oryx Gas Tanzania emerged as the market leader with a 49% market share, followed by Taifa Gas Limited with a 21% market share, and Manjisi Gas with an 11% market share. Lake Gas, O Gas, and Orange Gas had market shares of 8%, 7%, and 2%, respectively. Also, Meru Gas and Cam Gas each had a 1% market share.

Regional LPG consumption was reviewed and monitored during the year under review. The Coastal Zone, which includes Dar es Salaam, Coast, Morogoro, Mtwara, Lindi, and Ruvuma regions, led the way with an average LPG consumption of 47% of total consumption, followed by the Northern Zone at 19%. The Northern Zone includes the regions of Arusha, Kilimanjaro, Manyara, and Tanga.

The Lake Zone (Mwanza, Mara, Geita, Shinyanga, Kagera, and Simiyu) and the Central Zone (Dodoma, Singida, Kigoma, and Tabora) had consumption levels of 12% each. The remaining 9% was occupied by the Southern Highland Zone (Iringa, Njombe, Mbeya, Katavi, Rukwa, and Songwe).

The LPG business is still a growing business. LMCs can continue to penetrate the market based on marketing strategies and competitive advantages such as distribution network, customer service, advertisement, brand image or loyalty, and sales discounts.

The Government, in collaboration with LPG Marketing Companies and other key stakeholders such as the Rural Energy Agency continued to promote the use of LPG as an alternative energy source, particularly in rural and low-consumption areas.

The Government launched a nationwide LPG awareness campaign in 2022 and developed a Clean Cooking Road Map which aims at transitioning from use of charcoal and firewood to use of cleaner energy sources in cooking, both in urban and rural areas.

Table 20: LPG Marketing Companies Market Share for the year 2022

TOTAL SALES LOCAL	Coastal Zone	Central Zone	Northern Zone	Lake Zone	Southern Highland Zone	Total Sales	Market Share

6. SUPPLY OF LUBRICANTS

Lubricants supplied in the country are from imports of finished goods and local blending. Currently, there are six lubricant blending plants namely Oryx Service and Specialities Ltd, Total (T) Ltd, Mineral Oil Ltd, General Petroleum Ltd, Lake Lubes Ltd and Mogas (T) Ltd. The quantity of lubricants supplied into the market in the year 2022 was 58,481,785 litres whereas 47,957,561 litres equivalent to 82% were blended at the aforementioned blending plants and 10,524,224 litres equivalent to 18% were imported. Basically, the lubricant business is growing in Tanzania.

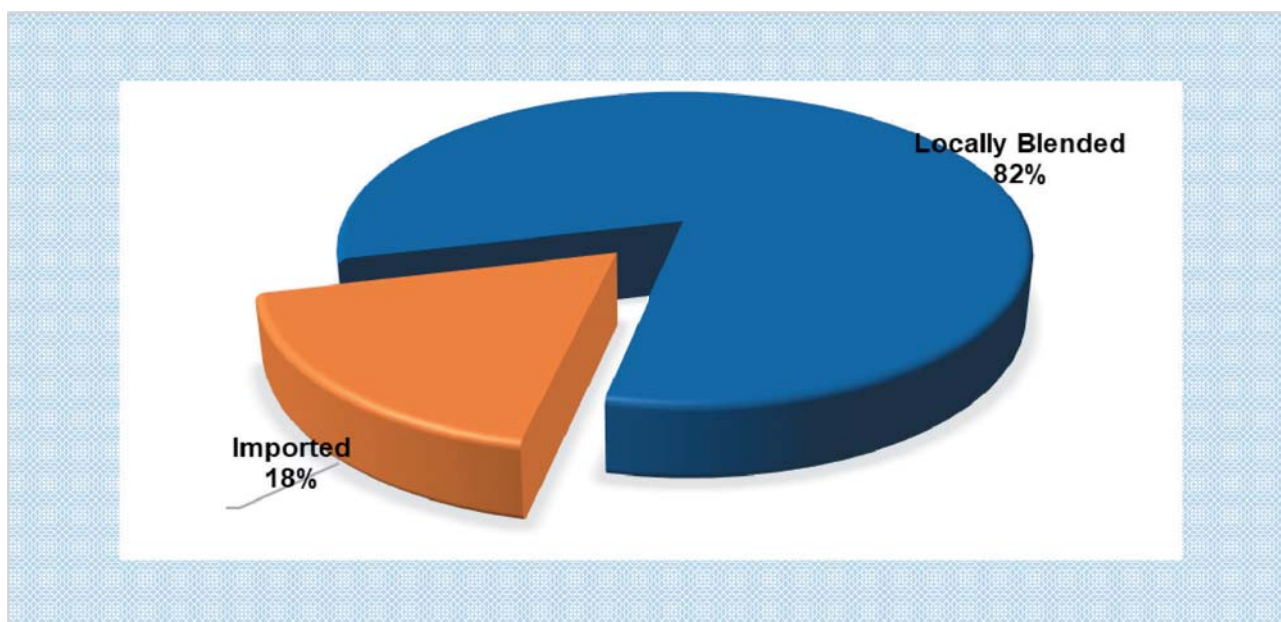

Figure 24: Contribution of Imported and Local Blended Lubricants in 2022

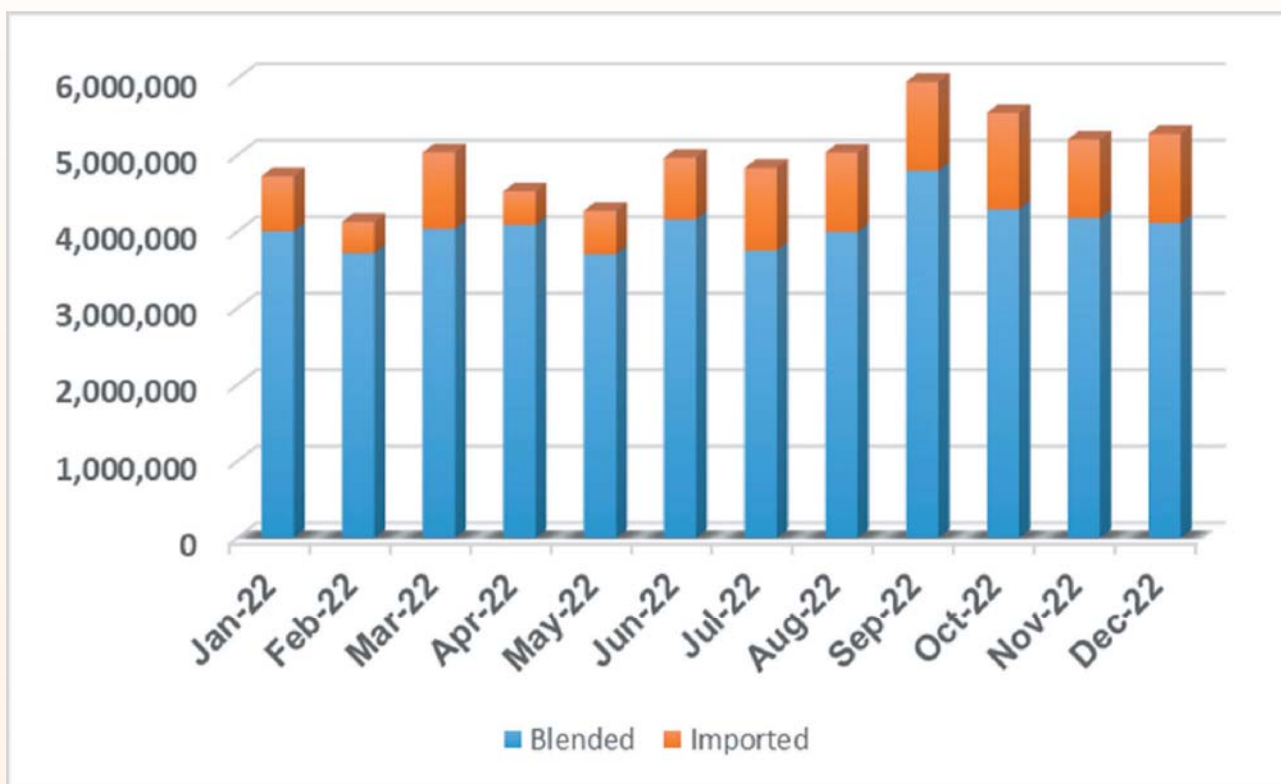

Figure 25: Locally Blended and Imported Lubricants in 2022

Table 21 shows the quantities of lubricants imported and locally blended in the year under review. The lubricant volume in year 2022 increased by 5% compared to the volumes in the year 2021.

Table 21: Locally blended and imported lubricants in year 2022

	BLENDED	IMPORTED	TOTAL

7. LICENSING ACTIVITIES

Pursuant to Section 131(1) of the Petroleum Act, Cap 392, any person who intends to undertake a regulated activity is required to apply to EWURA for a licence. The petroleum licenses that are issued by the Authority include petroleum wholesale, petroleum storage, retail outlets commonly known as petrol stations, LPG distribution, and lubricants wholesale to mention a few. For smooth implementation of this obligation, EWURA processes licences through its online application system namely, **License and Order Information System (LOIS)** which is accessed through the EWURA website www.ewura.go.tz or <https://lois.ewura.go.tz/ewura/home>.

In the year 2022, EWURA issued a total of 503 licences, which is equivalent to a decrease of 5.27% compared to 531 licences issued in the year 2021. Out of 503 licences, 319 licences were issued to new applicants whereas 184 licences were renewed.

EWURA continues to license LPG distributors and encourages the establishment of low-cost petrol stations in rural areas to increase the availability of LPG across the country and quality petroleum products in rural areas. On the other hand, EWURA kept granting conditional licenses to rural petrol stations that complied with the essential technical standards without endangering HSE requirements.

A summary of licences issued in the year 2022 is shown in **Table 22** whereas the list of applicants that were granted licences in 2022 is presented in **Appendix 6**. The Authority will continue to issue licenses to qualified applicants for licences.

Table 22: Petroleum Licences Issued in 2022

Licence Type	No. of New Licences	No. of Renewed Licences	Total No. of issued Licences
Bunkers Licence	1	0	1
Condensate Dealership	2	0	2
Consumer installation	14	0	14
LPG Distribution	16	1	17
LPG Wholesale Licence	4	1	5
Lubricant Wholesale	8	1	9
Petroleum Storage	2	2	4
Petroleum Wholesale	20	12	32
Retail	198	158	356
Village Retail	54	9	63
Grand Total 2022	319	184	503
Grand Total for 2021	324	207	531

8. COMPLIANCE MONITORING AND ENFORCEMENT

During the review period, EWURA continued to carry out compliance monitoring programmes and enforcements in several regulated areas to ensure that operators in the mid and downstream petroleum sub-sector adhered to the relevant laws, rules, standards, and Best Petroleum Industry Practices. Compliance monitoring activities included a sampling of petroleum products for checking the quality of products, monitoring fuel marking project, conducting fuel marker detection tests, an inspection of petroleum facilities to check compliance to infrastructure standards and HSE requirements, and monitoring compliance to the published petroleum cap prices.

Operators who were found to violate applicable laws and standards faced legal action. This section describes the compliance monitoring programmes and enforcement in various regulated areas conducted during the period under review.

8.1. Monitoring Compliance to Petroleum Infrastructure Standards

EWURA continued to conduct regular and ad hoc compliance monitoring inspections of petroleum facilities in order to monitor compliance with the applicable laws, standards, licence terms and conditions, HSE requirements, and the Best Petroleum Industry Practices. The facilities that were inspected for compliance monitoring included petrol stations, petroleum storage depots, petroleum consumer installations, LPG storage and filling plants, LPG super dealers' warehouses, lubricant blending plants, and lubricant wholesalers' warehouses.

In the year 2022, the Authority conducted compliance monitoring inspections to 659 facilities, whereby 550 facilities complied with licence terms and conditions, applicable laws, HSE requirements, and the Best Petroleum Industry Practices. This is equivalent to an 83.46 % compliance level, which is 22.46% higher compared to the 61% attained in 2021. Legal action was taken against facilities that were found to be non-compliant, including the closure of the facilities until the respective operators rectified anomalies. The Authority will continue to conduct regular compliance monitoring and enforcement in order to ensure all petroleum facilities are operated at a high level of compliance. The Authority will also continue to raise awareness among petroleum operators and the public to ensure petroleum handling facilities meet the required standards at all times.

8.2. Monitoring Compliance to Petroleum Products Quality

As per Section 30(2)(b) of the Petroleum Act, Cap 392, EWURA has been mandated to monitor petroleum quality and standards. Similarly, section 179(1) of the same Act requires that a person shall not distribute petroleum products unless such petroleum products conform to quality, safety, and environmental specifications set out in the regulations made by the Minister.

In implementing the above-mentioned function, EWURA has been conducting quality checks on petroleum products in accordance with the Petroleum (Sampling and Testing) Rules, 2010, GN No. 211. During the period under review, the Authority collected a total of 942 samples, whereby 874 were from licensed petroleum facilities, 59 were from Police for investigations and 15 samples were from condensate road tanker trucks. Quality tests for the collected samples were conducted at accredited laboratories to check for conformity of products to Tanzanian standards. **Table 23** provides details of the collected samples and test results.

Table 23: Number of collected samples in year 2022

Category	Type of facility	Collected Samples	Passed Samples	Failed Samples
Licensed petroleum facilities	Retail outlets	774	742	32
	Petroleum Storage Depots	72	72	0
	Lubricants Wholesalers	28	28	0
	Sub Total	874	842	32
Others	Police investigation	59	51	8
	Condensate	15	15	0
	Sub Total	74	66	8
Grand Total		948	908	40

Out of 874 samples collected from licensed facilities, 842 conformed to National Standards, whereas 32 samples, equivalent to 3.66% did not conform to the standards. The 32 samples that failed quality tests were collected from 31 retail outlets. Comparing a non-conformity of 6.16% registered in the year 2021, there is an increase in the level of compliance with petroleum products quality specifications by 2.50% for the year 2022. The Authority will continue to put more effort to ensure a 100% level of compliance is attained at all times and hence only quality petroleum products are supplied to the market. **Figure 26** presents a trend of non-conformity to petroleum products quality from the year 2011 to the year 2022

**Figure 26: Trend of Non-Conformity to Quality Standards from 2011 to 2022**

Legal action was taken against petroleum operators found with non-conforming petroleum products in accordance with Section 179(2)(a) and (c) of the Petroleum Act, Cap 392. The legal action included the closure of facilities, payment of requisite fines, and blending of non-conforming products.

8.3. Monitoring Compliance with Fuel Marking Programmes

In the fight against dumping of transit, tax-exempted, and smuggled petroleum products into the local market, EWURA continued to oversee the implementation of the fuel marking programme since its inception in September 2010. The marking programme is done under the Petroleum Products (Marking and Quality Control) Rules, 2010, GN. No. 210.

The Authority continued to monitor the fuel marking program to ensure that it is executed by the Petroleum Products (Marking and Quality Control) Rules, GN. No. 210. During the period of review, a total of 3,930,935,592 litres of petroleum products were marked compared to 3,560,695,945 litres reported in the year 2021, equivalent to an increase of 10.4%. The volume of petrol marked in 2022 was 1,593,770,234 litres which is an increase of 8.9% while the volume of marked diesel was 2,073,237,328 litres which is an increase of 12.1%. An increase in the marked volume of petrol and diesel is an indicator of growth in demand which emanates mainly from the growth of economic activities and human well-being.

The volume of marked kerosene declined by 43.0% to a reported volume of 13,729,250 litres. The continued decrease in the quantity of consumed kerosene is attributed to the availability and accessibility of affordable alternative energy sources including LPG, solar energy, and electricity which are facilitated by the intensive rural electrification program. The decline in the quantity of consumed kerosene is also attributed to continued compliance monitoring and enforcement done by the Authority to curb adulteration of petroleum products which may be done using different products including kerosene. **Table 24** presents the monthly marked volume in 2022 whereas **Figure 27** shows a trend of marked volumes of kerosene from the year 2012 to the year 2022.

Table 24: Summary of Marked Volumes in 2022 (in litres)

	Petrol	Diesel	Kerosene	Total
January	128,568,869	179,631,175	1,600,300	309,800,344
February	114,865,800	172,097,296	1,319,640	288,282,736
March	133,154,742	188,625,609	1,585,500	323,365,851
April	128,981,150	177,835,461	1,505,000	308,321,611
May	107,563,113	162,610,376	987,210	271,160,699
June	139,845,790	195,658,824	1,418,000	336,922,614
July	137,382,315	197,254,952	1,232,800	335,870,067
August	136,952,126	207,232,845	579,500	344,764,471
September	140,633,693	211,119,381	905,500	352,658,574
October	138,196,725	209,372,821	723,000	348,292,546
November	139,180,000	213,203,680	772,700	353,156,380
December	148,445,911	208,793,688	1,100,100	358,339,699
TOTAL 2022	1,593,770,234	2,323,436,108	13,729,250	3,930,935,592
TOTAL 2021	1,463,358,089	2,073,237,328	24,100,529	3,560,695,946
% Change	8.9%	12.1%	-43.0%	10.4%

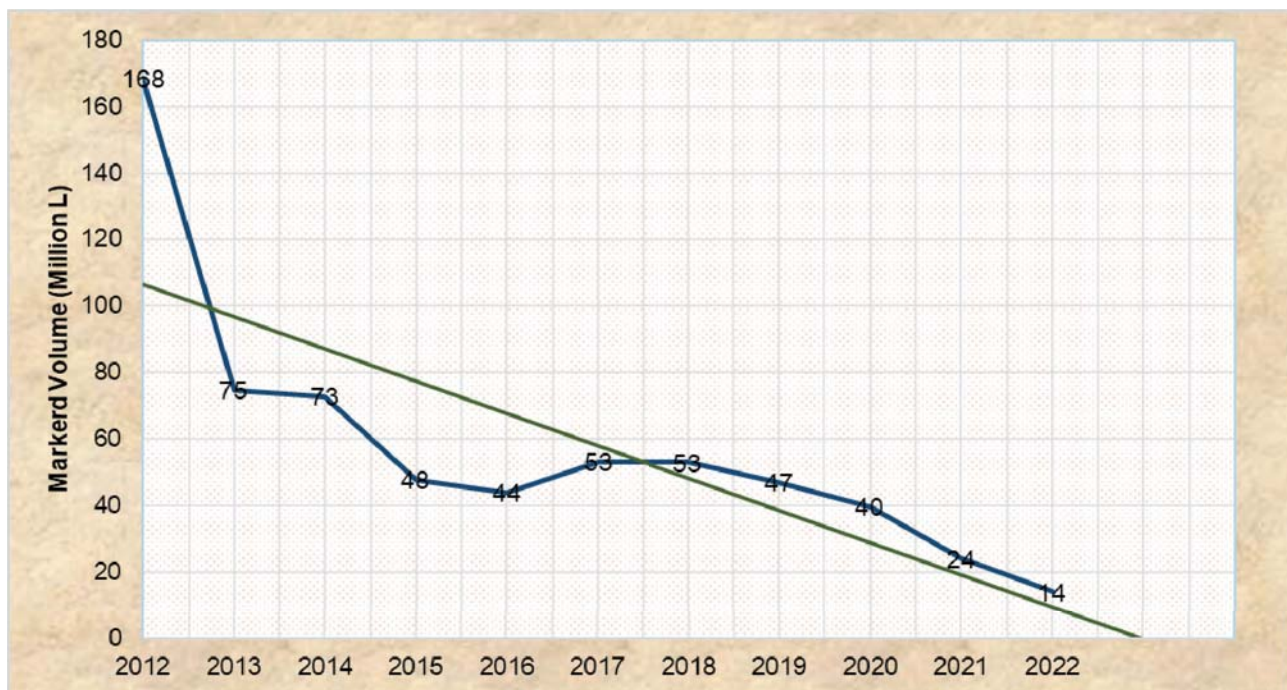

Figure 27: Trend of Kerosene Marked Volumes from 2012 to 2022

The Authority took legal action against operators who were found with non-conforming petroleum products under the Petroleum Product (Marking and Quality Control) Rules, 2010, which included the closure of the facilities and the payment of the required fines. Operators discovered with tax-exempt and transit petroleum products were referred to TRA for payment of evaded taxes and other penalties imposed by customs laws.

Figure 28: Trend of Marker-Failed Facilities from 2011 to 2022

The Authority will continue to conduct surveillance monitoring of petroleum facilities in order to crack down on illegal operators who sell/offer for sale petroleum products that do not comply with the Petroleum (Marking and Quality Control) Rules, GN No. 210.

8.4. Compliance to Price-Setting Rules

As per Energy and Water Utilities Regulatory Authority (Petroleum Products Price Setting) (Amendments) Rules, 2017 GN. 163, the Authority continued to publish and monitor the compliance of petroleum cap prices. The petroleum products' cap prices are computed monthly and issued to the public on the first Wednesday of every month. In 2022, the Authority conducted compliance monitoring of cap price to 1,447 petrol stations across the country. Out of 1,447 petrol stations, 25 stations were found selling petroleum products above cap prices, which is equivalent to 1.73%. This shows that the compliance level to cap prices decreased from 100% achieved in 2021 to 98.27% for the year under review. Legal action was taken against the operators found selling above the cap prices. The Authority will continue to monitor compliance to the published cap prices and ensure that 100% compliance level is maintained at all times.

8.5. Issuance of Construction Approvals

Section 126(1) of the Petroleum Act, Cap 392, requires that any person intending to construct a petroleum installation or petroleum carriage facility is required to apply and obtain construction approval from EWURA. Section 127(1) of the Petroleum Act Cap 392 prohibits the construction of petroleum installations without approval from EWURA. Constructing without approval is an offence punishable under the law.

In the year 2022, the Authority evaluated and approved a total of 253 applications for construction approvals which is equivalent to a decrease of 3.8% compared to 263 granted construction approvals in the year 2021. Out of 253 construction approvals granted, 251 were for the construction of petrol stations, 1 for an LGP storage and filling plant, and 1 for the EACOP Pipeline. **Appendix 7:** List of applicants that were granted construction approvals in year 2022 shows the developers who were granted construction approvals.

8.6. Construction Approval for EACOP Pipeline System

The EACOP project came as a result of the discovery of crude oil in Uganda in 2006. The Stock Tank Oil in Place (STOIP) is estimated to be 9 billion barrels. However, the recoverable oil given the existing technology is estimated to be 6 billion barrels. On 23rd April 2016, the decision to develop a crude oil pipeline from Hoima, in Uganda, to Tanga, in Tanzania was taken. On 26th May 2017, the Governments of Tanzania and Uganda entered into an Inter-Governmental Agreement (IGA) which set out common principles between Tanzania and Uganda to facilitate implementation of the EACOP project. On 20th May 2021 and 11th April 2021 respectively, the Governments of Tanzania and Uganda signed Host Government Agreements (HGAs) with the investor namely Total East Africa Midstream B.V. on behalf of the East African Crude Oil Pipeline (EACOP) Limited.

Following the signing of the respective HGAs by the governments of Tanzania and Uganda, the Final Investment Decision (FID) was announced on 2nd February 2022. As a result of the signing of the HGAs, EACOP Limited was established on 18th February 2022. The main responsibilities of EACOP Limited are to construct and operate the EACOP Pipeline System. EACOP Limited is owned by four shareholders, namely the Government of the United Republic of Tanzania through the Tanzania Petroleum Development Corporation ("TPDC") (15%), the Government of the Republic of Uganda through Uganda National Oil Company ("UNOC") (15%), Total East Africa Midstream B.V. (62%) and China National Offshore Oil Corporation (CNOOC) (8%). EACOP Limited is a company registered in the United Kingdom with its headquarters in Uganda. During the operations phase, EACOP Limited will take custody of the oil at the flange immediately after the upstream fiscal metering until the loading flange on the marine jetty in Tanga Bay. The ownership of the oil remains with the Upstream Shippers

(Government of Uganda, TotalEnergies E&P Uganda, CNOOC Uganda, and UNOC).

The EACOP Pipeline System from Hoima in Uganda to Chongoleani in Tanzania has a length of 1,443km. On the Ugandan side, EACOP Pipeline System has 296 kilometres while on the Tanzanian side, it will stretch for 1,147 kilometres. The pipeline will have a diameter of 24 inches and it will be buried at a depth of 1.8 to 2 meters. The design capacity of the pipeline is 216,000 barrels per day. In Ugandan part, East African Crude Oil Pipeline (EACOP) will traverse ten (10) districts from Hoima to Kyotera while in Tanzania, the Pipeline System will across eight (8) regions, twenty-four (24) districts, and one hundred thirty-four (134) wards. The regions include Kagera, Geita, Shinyanga, Tabora, Singida, Dodoma, Manyara and Tanga.

The EACOP pipeline system will have six pumping stations with two in Uganda and four on the Tanzanian side, three pressure reduction stations all in Tanzania, one marine storage and export terminal (MST), 20 heating stations along the route, and an offshore jetty facility at Chongoleani in Tanga Region.

The pipeline will be coated with fusion-bonded epoxy to preserve heat and protect the pipelines against external corrosion or deterioration during the project's lifetime. The crude oil is waxy in nature and will have to be heated to flow. The crude oil will be required to be at a temperature of at least 50°C to flow in the pipeline.

The international applicable standards will be applied in the designing, construction, and operationalisation of the EACOP project

On 27th October 2022, EWURA approved the construction approval for construction of the EACOP pipeline system for EACOP Limited. Main construction works for the pipeline are expected to commence in August 2023 and the completion period for the EACOP Pipeline System is expected to be 36 months.

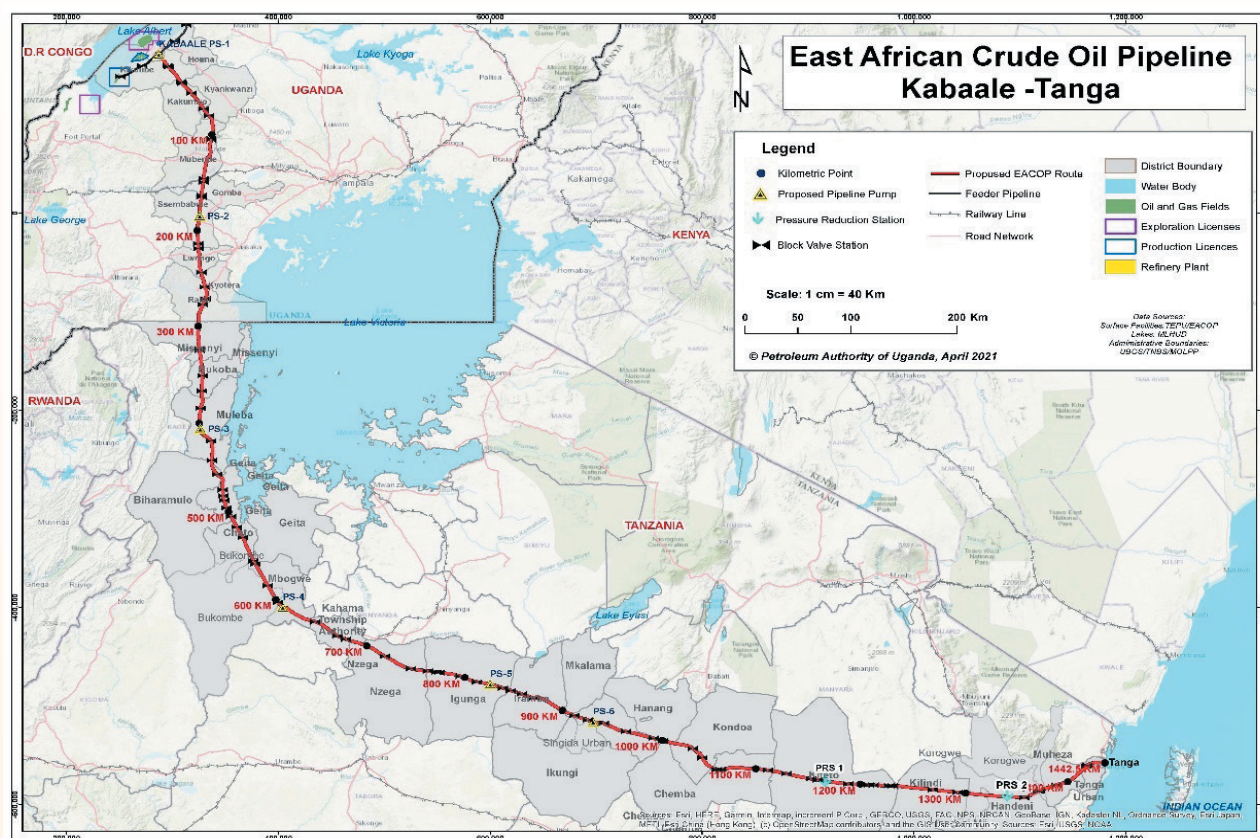

Figure 29: The EACOP Route in Uganda and Tanzania

8.7. Construction of Petroleum Facility without Approval

The Authority continued to monitor compliance at various petroleum facilities that were under construction. During the review period, 46 new facilities were found to be under construction without the Authority's approval. **Appendix 9** contains a list of petroleum installations built without construction approvals in 2022. In accordance with Section 127(2) of the Petroleum Act, Cap 392, punitive measures were imposed on the defaulters. To ensure compliance, the Authority will continue to conduct awareness campaigns and enforcing the rules.

8.8. Monitoring Compliance to HSE in Petroleum Operations and Transportation

As provided in Sections 30(1)(i) and 30(1)(k) and Section 179 (1) of the Petroleum Act, Cap 392, the Authority is required to ensure that all operators of petroleum and gas facilities operate in a manner that does not pose a threat to public health, safety, and the environment (HSE). In compliance with the above-mentioned legal requirements, the Authority continued to conduct compliance monitoring to HSE requirements for petroleum facilities and operators across Tanzania mainland.

In the year 2022, a total of three (3) operators were found undertaking petroleum and Liquefied Petroleum Gas (LPG) operations in a manner that is detrimental to HSE requirements. Out of three (3), two (2) were found conducting illegal re-filling of LPG cylinders contrary to Rule 32 of the Petroleum (Petroleum Liquefied Gas Operations) Rules, 2020, GN. No. 825. The remaining one (1) operator was found with a waste oils recycling plant producing industrial diesel oil (IDO) from petroleum sludges procured from TIPER. All three incidences occurred in the Dar es Salaam Region. The Authority seized the LPG cylinders found at the site and handed over the same to the respective suppliers to keep them in safe custody. The Authority has taken legal action against the individuals found undertaking liquefied petroleum gas (LPG) operations in a manner that is detrimental to HSE requirements. Legal action was also taken against the operator of the waste oils recycling plant.

The Authority will continue to undertake planned and ad-hoc inspections to monitor compliance with HSE requirements. **Table 25** presents a summary of operators that were found operating contrary to HSE requirements, whereas **Figure 30** and **Figure 31** show pictures of some illegal re-filling incidents captured during the inspections. **Figure 32** shows pictures of the waste oils recycling plant conducting operations that are contrary to HSE requirements.

Table 25: Incidents that occurred contrary to HSE requirements in year 2022

SN	Incident description and Location	Incident Impact(s)	Corrective Actions
1	A waste oil recycling facility named Guoyang Biotech Company Ltd, located at Kiboga Village, Ilala Municipality in Dar es Salaam.	The facility was operating in a manner that is detrimental and contrary to Health, Safety and the Environment (HSE).	The Authority ordered the company to stop operation.
2	Two incidents of liquefied petroleum gas (LPG) illegal re-filling were discovered at different locations as described below: (i) Premises of Mr. Emmanuel Chodota located at Mwongozo Street, Ubungo Municipality in Dar es Salaam. Inspection of the premises was done in collaboration with Police Officers and Oilcom Tanzania Limited. (ii) Premises of an individual at Kariakoo Tandamiti/ Likoma Street in Ilala Municipality in Dar es Salaam. Inspection of the premises was done on 4th August 2022 in collaboration with O-Gas Tanzania Limited and Police Officers.	Illegal re-filling of LPG poses imminent danger to health, safety and environment. The consequences of LPG illegal refilling include fire explosion, loss of property, loss of life and depriving consumer's of the right to receive the correct quantity of LPG.	The action taken by the Authority include: - (a) Seizure of LPG cylinders found at a site and handing them over to respective LPG companies to keep them in safe custody; (b) Issuing compliance order to a person found conducting illegal re-filling and/ or handing over the person to the police for further investigation and legal proceedings. This is to comply with Rule 32 of the Petroleum (Petroleum Liquefied Gas Operations) Rules, 2020, GN. No. 825; and/or (c) Issuing compliance order and other legal action to the respective LPG supplier for failure to monitor their cylinders which are above 16kg in case that cylinder is used in conducting illegal re-filling. This is in accordance to Rule 41 of the Petroleum (Petroleum Liquefied Gas Operations) Rules, 2020, GN. No. 825.

Figure 30: Illegal re-filling found undertaken by Mr. Habibu Mussa Shoo at Kariakoo Tandamiti/Likoma Street in Ilala Municipality in Dar es Salaam Region

Figure 31: 38kg gas cylinders from Manjis being decanted to 6kg gas cylinders from Lake and Oryx

Figure 32: A view of M/S Guoyang Biotech Company Limited's waste oils recycling plant

9. ENVIRONMENTAL IMPACT ASSESSMENT AND AUDIT REVIEW

The Environmental Management Act, 2004, and the Environmental Impact Assessment and Audit Regulations, 2005 require a project developer or proponent to conduct Environmental Impact Assessment and Audit studies. EIA studies are conducted prior to the commencement or financing of a project or undertaking while Environmental Audit studies are carried out after the commencement of operations. The regulations further prohibit any licensing Authority in mainland Tanzania to issue a licence unless the applicant produces to the licensing Authority an Environmental Impact Assessment Certificate issued by the Minister responsible for the Environment.

In compliance with the Environmental Management Act, from January to December 2022, the Authority reviewed 252 Environmental Impact Assessment (EIA) and Environmental Audit (EA) studies received from project proponents and operators in the petroleum downstream sub-sector. This is an increase of 33% compared to 189 EIA and EA studies reviewed in the year 2021. This trend shows there is a high compliance level with the Environmental Management Act, of 2004. EWURA will continue providing awareness to the public so that prospective investors are aware of the importance of getting EIA from NEMC, which is one of the requirements for obtaining construction approval from EWURA.

10. INCIDENT INVESTIGATIONS

During the period under review, the Authority continued to investigate incidents focusing on identifying their causes and recommending corrective actions so that controls can be put in place to prevent the recurrence of similar incidents in the future. This is in accordance with Section 30(2)(o) of the Petroleum Act, Cap 392 which requires the Authority to investigate incidents that result in damage to infrastructure, injury, or loss of life or property.

During the year under review, a total of five (5) incidents were investigated, whereby four of those incidents involved overturned road fuel tankers in Mbeya, Coast, and Dodoma regions, one fire incident occurred at Mansoor Industries Limited (MOIL) fuel storage depot located on Plot no. 64-67, Vijibweni Industrial Area, Kigamboni District in Dar es Salaam Region.

The incidents occurred mainly due to mechanical failures of road tankers and loss of control of the tankers due to driver fatigue. The impacts emanating from overturned road tankers included product losses, damage to some of the trucks, injuries, and one fatality. **Appendix 9: Summary of Petroleum HSE Incidents Investigated in 2022** depicts a detailed description of the incidents that were investigated in the period under review while **Figure 33** and **Figure 34** show some of the pictures taken at the scenes of the incidents.

Figure 33: A truck with registration numbers T723 DPJ/T980 CQD loaded with 33,000 litres of diesel that was involved in an accident near River Kiwira Bridge in Rungwe District

Figure 34: A truck with registration numbers T723 DPJ/T980 CQD loaded with 33,000 litres of diesel that was involved in an accident near River Kiwira Bridge in Rungwe District

11. REGULATORY IMPACT

Through various regulatory interventions, EWURA has made the following impact in the mid and downstream petroleum sub-sector during the year 2022:

- (i) Stable supply of petroleum products in the country by monitoring available stocks and procurement plans;
- (ii) Increased compliance to infrastructure standards;
- (iii) Increased number of petrol stations in rural areas through targeted standards that are aimed at reducing investment costs while maintaining HSE standards;
- (iv) Ensuring petroleum products that are distributed in the country meet the required national standards;
- (v) Protection of efficient suppliers and Government tax revenues through the fuel marking programme; and
- (vi) Protection of consumers and efficient suppliers through issuance of monthly petroleum product cap prices and periodic compliance monitoring.

12. CHALLENGES IN THE SUB-SECTOR

The sub-sector still faces the following challenges:

- (i) Absence of a Single Receiving Terminal for white petroleum products that will ensure products are received within a short period and hence reduce demurrage costs and allow receipt of more vessels within a given period of time;
- (ii) A need for increased investments in petrol stations in rural areas to ensure petroleum products are available in those localities and are supplied in a manner that observed health, safety and environmental issues;
- (iii) Smuggling of petroleum products from neighbouring countries and dumping of transit products. EWURA will continue to work with other Government institutions to curb such illegal businesses;
- (iv) Limited capacity of LPG offloading facility at KOJ2, which prevents the industry from achieving economies of scale in importation;
- (v) High starter pack cost for new LPG consumers, which limits the increase of users of LPG, especially low-income earners. The starter pack includes cylinders, burners and cookers; and
- (vi) Continued illegal re-filling of LPG cylinders, which is mostly done by decanting LPG from 38kg cylinders to 15kg cylinders and 6kg cylinders. This malpractice distorts fair competition in the market and poses an imminent danger to health, safety and the environment.

13. FUTURE OUTLOOK OF THE PETROLEUM SUB-SECTOR

As consumption of petroleum products continues to grow in the country and in neighbouring countries, there is need to increase the storage capacity of the country and improve the offloading and receiving facilities so that larger vessels can be received and offload within a short period of time. In order to attain this, the Government has a vision of making Tanzania a hub for white petroleum products, so as to cater to the growing demand in the country and from all landlocked countries that rely on the ports of Tanzania.

In order to increase efficiency in receiving petroleum products, plans are underway for installation of a Supervisory Control and Data Acquisition (SCADA) system to monitor the receipt of petroleum products from vessels and the amount received in each storage terminal. Plans are also underway to set a requirement for installation of Automatic Tank Gauges (ATG) to ensure the Authority is able to effectively monitor the availability of petroleum products in the country.

The Government is promoting the use of clean energy for cooking to protect the environment from deforestation and protect the health of individuals from smoke produced from cooking using firewood and charcoal. The Ministry of Energy is thus promoting the use of LPG as a clean source of energy. This includes implementation of fiscal policies such as the provision of subsidies on small-size LPG cylinders and reduction of taxes on LPG accessories.

14. CONCLUSION

The petroleum mid and downstream sub-sector, in general, continued to perform well through the improvement and increased investments in infrastructure, well managed procurement of petroleum products through the Bulk Procurement System and periodic compliance monitoring activities. The Authority will continue to monitor the performance of the sub-sector to ensure the availability, quality, and affordability of petroleum products for the betterment and contribution to the economic growth of the country. In order to maintain the current success and for further improvement, the Authority will:

- (i) Increase compliance monitoring activities to ensure maximum compliance by operators to applicable laws, regulations, rules, standards, and international best practices;
- (ii) Continue with the promotion of investments in low-cost petrol stations for rural areas to improve the quality and availability of petroleum products in rural areas;
- (iii) Continue to promote the use of LPG and providing awareness to LPG operators especially those distributing and handling LPG cylinders as well as the development of promotional materials for each market segment down to end-users; and
- (iv) Engage with other Government institutions to address challenges in offloading and receiving facilities of white petroleum products and LPG.

APPENDICES

Appendix 1: Storage capacities for import terminals at receiving ports in Tanzania 2022

S/N	Name of the Company	Location	Petrol	Diesel	Kerosene	Jet A-1	HFO 125	HFO 180	IDO	TOTAL

32.	Mkombozi Lusana- Mkombozi Nangemelo Petrol Station, Nyamwage Village, Rufiji	Coast Region	Retail Outlet
33.	Mount Meru Petroleum Ltd - Mbezi Luis Petrol Station	Dar es Salaam	Retail Outlet
34.	Mtweve Oil Ltd - Ifumbo Petrol Station	Ifumbo Village -Chunya - Mbeya	Retail Outlet
35.	Musa Mungo Chole - Maganzo Petrol Station	Shinyanga	Retail Outlet
36.	Nasser Abdullah Saeed Energy Limited Petrol Station	Dar es Salaam	Retail Outlet
37.	Petroafrica (T) Limited - Makambako Service Station	Makambako - Njombe	Retail Outlet
38.	Puma Energy Tanzania Limited - Seronera Service Station	Serengeti National Park - Mara	Retail Outlet
39.	Richard Juma Manyilizu Filling Station	Muda Village, Nyaguge Ward-Magu District in Mwanza Region	Retail Outlet
40.	Rosemary Ludovick Kimaro-Nditiye Filling Station	Busunzu Village, Busunzu Ward, Kibondo District Kigoma Region	Retail Outlet
41.	Safari Masesa Masasi - Nyamilembe Filling Station	Nyamilembe Village Chato - Geita	Retail Outlet
42.	Samira Khalfan Amour Filling Station	Kikoma Village, Lusahunga Ward, Biharamulo District in Kagera Region	Retail Outlet
43.	Semeni Saidi Ulanga Semeni Filling Station	Dar es Salaam	Retail Outlet

S/N	Name of Facility	Location	Facility Type
44.	Sindano Daniel Salima Petrol Station	Murangi Village, Musoma Rural District, Mara Region	Retail Outlet
45.	Tryphone Shilekelo Male Petrol Station	Sengerema - Mwanza	Retail Outlet
46.	Tumaini Josia Busiliye & Jusilu Tanada Bihahazo Enterprises Filling	Vikindu - Coast Region	Retail Outlet

Appendix 9: Summary of Petroleum HSE Incidents Investigated in 2022

SN	Incident and Location	Incident Description	Incident Impact(s)	Corrective Actions
1	Petroleum road tanker with registration numbers T723 DP/J T980 CQD owned by Lake Trans Limited overturned on 16th April 2022 at River Kiwira, Kiwira Area, Rungwe District in Mbeya Region and caused spillage of petroleum products	The incident was caused by loss of control by the driver due to a sharp corner and steep slope at the area that resulted into the overturn of the fuel road tanker at a bridge on River Kiwira	Impacts are: (a) Loss of diesel product (33,000 litres of diesel); (b) Environmental Pollution; and (c) Death of tanker driver and one passenger.	The Authority ordered the owner of the consignment: (i) to consult NEMC for guidance on cleaning up and restoration of the polluted area to its original state; and (ii) to inform the Authority after cleaning the site by submitting supporting evidence to show that clean-up of the polluted area has been done and is complete
2	Petroleum road tanker with registration numbers BCD3176ZM/BCD322ZM owned by Dalbit Petroleum Ltd was involved in an accident on 20 th May 2022 at Misugusugu area, Kibaha District in Coast Region.	The incident involved a road fuel tanker with Registration No. BCD3176ZM/BCD322ZM carrying PMS that was being transited from Dar es Salaam to Congo. The truck collided with another truck which was parked along Morogoro road	Impacts are: (a) Loss of petrol product (quantity was not established); (b) Environmental Pollution; and (c) The truck was completely burnt	The Authority ordered the owner of the consignment: (i) to consult NEMC for guidance on cleaning up and restoration of the polluted area to its original state; and (ii) to inform the Authority after cleaning the site by submitting supporting evidence to show that clean-up of the polluted area has been done and is complete
3	A road fuel tanker with Reg. No. T409 CQF / T812 CKY was involved in an accident at Mwakibete area in Mbeya City. The tanker was loaded with diesel to be offloaded at a retail outlet in Chapwa area – Tunduma, Momba District in Songwe Region. The loaded product belonged to Olympic Petroleum Tanzania Limited which was also the transporter of the cargo.	The tanker was loaded with diesel to be offloaded at a retail outlet in Chapwa area – Tunduma, Momba District in Songwe Region. The loaded product belonged to Olympic Petroleum Tanzania Limited which was also the transporter of the cargo.	Impacts are: (a) Minor injuries to the driver; (b) Loss of products 12,700 litres of AGO; (c) Environmental pollution due to oil spillages; and (d) Damage to the road fuel tanker truck.	The Authority informed NEMC and LATRA about the accident and also ordered the owner of the consignment to: (i) consult NEMC for guidance on cleaning up and restoration of the polluted area back to its original state; and (ii) once clean-up completed, should inform the Authority by submitting supporting evidence that clean-up of the polluted area has been done as required.

SN	Incident and Location	Incident Description	Incident Impact(s)	Corrective Actions
4	Fire incident occurred on 3rd June 2022 at Mansoor Industries Limited (MOIL) fuel storage depot located on Plot no. 64-67, Vijibweni Industrial Area, Kigamboni District in Dar es Salaam Region	During an operation that took place day and night for long hours as the company was having about six hundred (600) orders to load products and delivery to their respective customers, a fire incident occurred. The source of the fire is ball bearings getting extreme heat that caused it to fail to move around and hence dissipated heat in a shaft connected to a fuel pump of AGO that has a device to prevent fuel leakage (mechanical seal).	The loss caused by the incident was not established	The Authority ordered MOIL to: (i) remove temporary timber roofing structure surrounding pump house and combustible material; and (ii) improve housekeeping inside the tank farm and at pump house and not to use Pump No.1 until proper maintenance is done to the pump, including adhering to safe instructions
5	The incident occurred at Majawanga area, Chiwe Ward, Malindi Division, Kilifi District in Kilifi County. It involved a road fuel tanker owned by GB Tanzania Ltd with Reg. No. T870 DDW/ T853 AGS carrying diesel that was being transported to Mwanza. There was no harm to property and the driver sustained minor injuries	The fuel tanker owned by GB Tanzania Ltd with Registration No. T870DDW/T853AGS had loaded 40,000 litres of diesel (AGO) from Tanga Port that was being transited to Mwanza. Oil spills ranging to about 52m long and 39m wide along the Dodoma – Morogoro Road were found at the scene.	Impacts are: (a) Loss of diesel product (quantity was not established); and (b) Environmental Pollution due to spillage	The Authority informed NEMC and LATRA about the accident and also ordered the owner of the consignment to: (i) consult NEMC for guidance on cleaning and restoration of the polluted area back to its original state; and (ii) once clean-up completed, should inform the Authority by submitting supporting evidence that clean-up of the polluted area has been done as required.
