NARUC Women in Energy Regulation Internship Opportunities

The Energy and Water Utilities Regulatory Authority (EWURA) is an independent, world class regulatory authority responsible for licensing, tariff setting and quality of service regulation of the electricity, water, and petroleum and natural gas sectors.

NARUC is the national association representing the State Public Service Commissioners who regulate essential utility services in the United States. NARUC members are responsible for assuring reliable utility service at fair, just, and reasonable rates. Founded in 1889, the Association is an invaluable resource for its members and the regulatory community, providing a venue to set and influence public policy, share best practices, and foster innovative solutions to improve regulation.

EWURA in Collaboration with NARUC has internship opportunities for which suitably qualified Tanzanian women graduates are invited to apply. The program is sponsored by the USAID Energy Division/Office of Energy and Infrastructure/Bureau for Economic Growth, Education and Environment (E3).
